

The background of the book cover is a photograph. On the left, the Washington Monument is visible, its white stone surface contrasting with the clear blue sky. In the foreground, several purple tulips are in bloom, their vibrant petals and green stems adding a touch of color to the lower half of the image. The title 'EXPLORING THE C-SPAN ARCHIVES' is prominently displayed at the top. 'EXPLORING THE' is in a smaller, white, sans-serif font. 'C-SPAN' is in a very large, bold, red font, with the 'C' and 'S' being particularly large and stylized. 'ARCHIVES' is in a white, sans-serif font, similar in size to 'EXPLORING THE'.

sociology and related fields *Media as Procedures of Communication* Martin Luginbühl, Jan Georg Schneider, 2024-10-15
The book explores the multifaceted nature of media and communication by challenging traditional views that consider media solely as technical infrastructures for transmitting information. Instead, it focuses on mediality as an empirically relevant concept and proposes to understand media as socially constituted semiotic procedures that shape and are shaped by communicative practices. The book is structured around this central idea with four main sections. Part I examines digital environments, analyzing the interplay between multimodal approaches and mediality through case studies such as digital learning platforms and Zoom seminars. Part II focuses on journalistic procedures, investigating how media shapes political debates and news presentation on platforms like Instagram. Part III delves into embodied processes, particularly the role of the body movements and gestures in communication, illustrated through analyses of yoga tutorials and family dinner conversations. Part IV combines diverse semiotic and medial resources with studies on historical data interpretation and virtual reality gaming practices. The book aims to provide a comprehensive understanding of the role of different media in constituting meaning and shaping social interactions.

The Politics of Protest Nadia E. Brown, Ray Block Jr., Christopher Stout, 2020-12-17 This collection provides a deep engagement with the political implication of Black Lives Matter. This book covers a broad range of topics using a variety of methods and epistemological approaches. In the twenty-first century, the killings of Black Americans have sparked a movement to end the brutality against Black bodies. In 2013, BlackLivesMatter would become a movement-building project led by Alicia Garza, Patrisse Cullors, and Opal Tometi. This movement began after the acquittal of George Zimmerman, who murdered 17-year-old Trayvon Martin. The movement has continued to fight for racial justice and has experienced a resurgence following the 2020 slayings of Ahmaud Arbery, George Floyd, Breonna Taylor, Sean Reed, Tony McDade, and David McAtee, among others. The continued protests raise questions about how we can end this vicious cycle and lead Blacks to a state of normalcy in the United States. In other words, how can we make any advances made by Black Lives Matter stick? The chapters in this book were originally published in the journal *Politics, Groups, and Identities*.

Political Communication in Real Time Dan Schill, Rita Kirk, Amy E. Jasperson, 2016-10-04 Much has been made of the speed and constancy of modern politics. Whether watching cable news, retweeting political posts, or receiving news alerts on our phones, political communication now happens continuously and in real time. Traditional research methods often do not capture this dynamic environment. Early studies that guided the study of political communication took place at a time when transistors and FM radio, television, and widely distributed films technologically changed the way people gained information and developed knowledge of the world around them. Now the environment has transformed again through digital innovations. This book provides one of the first systematic assessments of real-time methods used to study the new digital media environment. It features twelve chapters authored by leading researchers in the field using continuous or real-time response methods to study political communication in various forms. Moreover, the authors explain how viewer attitudes can be

measured over time message effects can be pin pointed down to the second of impact behaviors can be tracked and analyzed unobtrusively and respondents can naturally respond on their smartphone tablet or even console gaming system Leading practitioners in the field working for CNN Microsoft and Twitter show how the approach is being innovatively used in the field Political Communication in Real Time is a welcome addition to the growing field of interest in big data and continuous response research This volume will appeal to scholars and practitioners in political science and communication studies wishing to gain new insights into the strengths and limitations of this approach Political communication is a continuous process so theories applications and cognitive models of such communication require continuous measures and methods

The Audience Decides Patrick A. Stewart, 2023-06-07 *The Audience Decides* argues that the political parties aided and abetted by mass media have abdicated one of their most important responsibilities that of providing and vetting the best leadership options available The search for followers ratings and attention has led to the structure of presidential debates especially during the primary season being driven by goals of entertaining the public at the expense of enlightening the citizenry To understand the role of the audience as active participant in political debates and how their function has been subverted this book focuses on behavior by the candidates and in person audiences during the 2016 and 2020 general election debates It does so by using observational methods to consider nonverbal behaviors by candidates to establish on stage dominance and the observable audience reactions by the in person audience and their effect on those following the debates It is anticipated that *The Audience Decides* will allow for evaluation and reconsideration of how debates or whatever replaces them might not only entertain but also enlighten the most important part of representative democracy the voting public Ultimately it is hoped that debates will help the audience decide who their leader will be based upon substance not style

LGBTQ Lobbying in the United States Christopher L. Pepin-Neff, 2021-05-26 *LGBTQ Lobbying in the United States* argues that the issues and tactics prioritized by the mainstream gay lobbying community fail to serve LGBTQ interests and are complicit in perpetuating heteronormative power dynamics and institutions that render queer and trans people vulnerable to structural oppression The book posits that there are different LGBTQ lobbying communities a dominant gay mainstream lobbying category whose work advances heteronormative ideals and a second category of LGBTQ lobbying that is intersectional and challenges hegemonic heterosexual institutions Analysis in the book builds on existing public policy literature and is aided by the author's practitioner experience in lobbying for LGBTQ issues in Washington D C over the past 20 years This book is suitable as a textbook for students and researchers in LGBTQ studies U S politics and gender studies The book will also appeal to activists and professionals in political lobbying
