Innovative Logistics Services and Sustainable Lifestyles Ani Melkonyan, Klaus Krumme, 2019-02-26 This edited volume aims to describe the transformation of supply chain management (SCM) and logistics services by merging sustainable logistics, SCM, sustainable consumption, and lifestyle research. This assessment of the transformation potential serves the development of sustainable business models and optimized decision-making systems for achieving sustainable economic value creation within a green economy. In 5 sections, the volume takes a unique transdisciplinary approach to assess sustainable business practices within SCM and the logistics sector and to understand the interactions between logistics services and consumer lifestyles while creating transparency within the decision-making process. This book will be of particular interest to academics, policymakers, planners, and politicians. Section 1 introduces readers to the importance of blended research and innovation between sustainable SCM and consumer lifestyles for transformation towards a green economy. Section 4 focuses on strategic decision-making in SCM and how long-term improvements of sustainability performance can be achieved.
