context **The 'Resource' Approach to Mathematics Education** Luc Trouche, Ghislaine Gueudet, Birgit Pepin, 2019-11-29 This edited volume will help educators better analyze methodological and practical tools designed to aid classroom instruction. It features papers that explore the need to create a system in order to fully meet the uncertainties and developments of modern educational phenomena. These have emerged due to the abundance of digital resources and new forms of collective work. The collected papers offer new perspectives to a rising field of research known as the Documentational Approach to Didactics. This framework was first created by the editors of this book. It seeks to develop a deeper understanding of mathematics teaching expertise. Readers will gain insight into how to meet the theoretical questions brought about by digitalization. These include how to analyze teachers' work when they prepare for their teaching, how to conceptualize the relationships between individual and collective work, and how to follow the related processes over the long term. The contributors also provide a comparative view in terms of contrasting selected phenomena across different educational cultures and education systems. For instance, they consider how differences in curriculum resources are available to teachers and how teachers make use of them to shape instruction. Coverage also considers the extent to which teachers make use of additional material, particularly those available through the global marketplace on the Internet. This book builds on works from the Resources 2018 Conference. Understanding teachers' work through their interactions with resources for teaching, held in Lyon, France.

American Universities and Colleges Praeger Publishers, 2010-04-16 For well over a half century, *American Universities and Colleges* has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that *Choice* magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public academic and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the baccalaureate degree. This essential resource offers pertinent statistical data on such topics as tuition, room and board, admission requirements, financial aid, enrollments, student life, library holdings, accelerated and study abroad programs, departments, and teaching staff, buildings and grounds, and degrees conferred. Volume two of the set provides four indexes, including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.

The Energetic Line in Figure Drawing Alon Bement, 2009-04-23 Well-crafted and class-tested, this guide to figure drawing features a unique teaching method. It focuses on learning to draw complete figures prior to the study of individual components, and it stresses action figures rather than the customary static

examples favored by most drawing and anatomy texts Employing more text than typical art instruction books it presents thirty figure drawing lessons and fifty six drawings and figures Each lesson includes detailed instructions on anatomical drawing accompanied by visual examples of strokes boxes and measurements Author Alon Bement taught art instruction to future art teachers at Columbia University and later founded the prestigious Maryland Institute of Art His students included Georgia O Keeffe who regarded him as a mentor and major influence Bement s nontraditional approach offers students at all levels an excellent opportunity to build their visual acuity and technical skills
