that is applicable to PTSD chronic pain and TBI Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists In Malingering Feigning and Response Style Assessment in Psychiatric Psychological Injury Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD pain and TBI He does so thoroughly and very even handedly neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD These are conservative and well grounded in the prior literature Finally the book contains dozens of very recent references giving testament to Dr Young s immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law Reviewer Steve Rubenzer Ph D ABPP Board Certified Forensic Psychologist

The Nature and Treatment of the Stress Response George S. Everly Jr.,R. Rosenfeld,2012-12-06 Barely more than twenty years ago the inquiry into the nature and implications of the psychophysiologic stress response seemed to be restricted to laboratory animals Today however scientists from a wide range of disciplines are studying stress and its implications for human health and disease This may be because our technical ability actually to measure the phenomenon has increased as has our understanding of human psychophysiology Just as important how ever may be the fact that we have entered a new era of disease According to Kenneth Pelletier we have entered upon an era in which stress plays a dominant role in the determination of human disease Pelletier has stated that up to 90% of all disease may be stress related Whether this estimation seems inflated or not the fact remains that clinicians of all kinds including physicians psychologists physical therapists social workers and counselors are daily being confronted with clients suffering from excessive psychophysiologic stress arousal This fact has created a need to know more about the stress response and its treatment Although more and more health care professionals are directly or indirectly working with clients who manifest excessive stress there has been no text previously written which attempted to condense between the covers of a single volume a practical clinically comprehensive discussion of what stress is as best we currently understand it and how to treat it when it becomes excessive
