

NELSON STUD WELDING

SPECIFICATION: **NBL** Unthreaded Studs

Nelson NBL studs are designed to be welded to heavy base materials and are used for a variety of applications. In the power generation market, they are used to anchor refractory to water walls and to facilitate heat transfer in coal burning furnaces. In forging applications, NBL studs are used as the tong hold on the ends of billets. They are also commonly used as locator pins, axles, pivot points, spacers, and stops.

Studs with diameters up to 1/2", and lengths up to 1-1/4" can be specially designed for use in automatic fed stud welding equipment.

Special secondary operations, such as cross-drilling, grooving, heat treating, and pointing, can expand the application possibilities of Nelson NBL studs.

For similar function studs, see Nelson **NBA** Aluminum Unthreaded studs and **NJL** Reduced Base Unthreaded studs.

✓ Check Standard Stock

When ordering, specify **Type, Diameter, Before Weld Length, Material, Quantity, and Part Number**

Example: NBL 3/8 x 1-1/8"; Stainless Steel; 10,000 pieces; #101064458
