J. Strauss, 2012-12-06 This is the 11th of the Pediatric Nephrology series created to help us be in touch with developments which are relevant to the problems we face daily in clinical practice and the questions we ask and try to answer in clinical and experimental research Like volume IX this one focuses on one of the subgroups to which we are committed the neonates special fluid and electrolyte requirements This volume has more on blood pressure and renal function and looks at the hormonal regulators There is greater depth about intoxications and nephrotic agents congenital disorders and mineral metabolism The exchanges were stimulating and the controversies were brought out without need of much of my usual prodding At Julie Ingelfinger s suggestion at the end of each panel discussion I have added a comment to

highlight the main points as I see them Otherwise the format remains as in past editions the papers given related to the four major topic areas each followed by panel and registrant discussion Although the transcription is almost verbatim you will not find the names of the discussants purposely omitted to ease my editorial work and to encourage everyone to speak candidly Some of the questions and answers are those submitted to the panelists after the sessions incorporated here by request Also frequent references are made to others work but their names have been omitted

Pediatric Nephrology Jose Strauss, 2012-12-06 Infectious and non infectious tubulointerstitial nephropathies are old subjects but there is enough confusion and disagreement on terminology and etiopathogenesis to warrant a new look at these problems We were fortunate in having at the Pediatric Nephrology Seminar 6 and as contributors to this volume the representative or shall I say originators of each of the three most identifiable positions Dr Renee Habib congenital anomalies Dr John Hodson reflux and Dr Robert Heptinstall infection Although some tend to hold onto one position and exclude others in this case there was overlapping of perception Dr Habib accepts a role for

infection in reflux and for infection in the presence of obstruction Dr Hodson accepts infection and congenital anomalies as modifiers and Dr Heptinstall takes an overall position which encompasses the three Thus the first part of the book emphasizes the complexity of something as seemingly simple as UTI and demonstrates awareness of disagreement even among the pros about meanings interpretations and treatment Drs Gustavo Gordillo Jorge de la Cruz and their associates emphasize the importance of predisposing factors for UTI Dr Materson focuses on the workup of the patient Dr Zilleruelo on bacteriological aspects and Dr Gorman on treatment approaches Dr Vaamonde reviews nephrotoxic agents Finally Drs Andres and Noble review the immunological aspects of various tubulointerstitial nephritides
