Neq6 Pro Manual:

The Astrophotography Manual Chris Woodhouse, 2015-05-01 The Astrophotography Manual is for those photographers who aspire to move beyond using standard SLR cameras and editing software and who are ready to create beautiful images of nebulae, galaxies, clusters and the solar system. Beginning with a brief astronomy primer, this book takes readers through the full astrophotography process from choosing and using equipment through image capture, calibration and processing. This combination of technical background information and the hands-on approach brings the science down to earth with a practical method to plan for success. Features include: Over 400 images, graphs and tables to illustrate these concepts. A wide range of hardware to be used including smartphones, tablets and the latest mount technologies. How to utilize a variety of leading software such as Maxim DL, Nebulosity, Sequence Generator Pro, Photoshop and PixInsight. Case studies showing how and when to use certain tools and overcoming technical challenges. How sensor performance and light pollution relate to image quality and exposure planning.

Choosing and Using a Dobsonian Telescope Neil English, 2011-07-25 In the 1960s, American amateur astronomer John Dobson designed a revolutionary kind of astronomical telescope featuring a lightweight large aperture reflecting system on a simple mounting using the then revolutionary material called teflon. The design combines simplicity and portability with large aperture prowess. Thirty years later, Dobsonians remain supreme for visually observing faint deep sky objects and are one of the best-selling large telescopes in the USA and Europe. This popularity is reflected in the recent increase of companies now heavily marketing Dobsonians in particular: Meade's Lightbridge range, Orion USA XT Intelliscope series and Skywatcher Skyliner and Flextube models. This book is the ultimate guide to buying and using commercial Dobsonians, both Econo and Primo models, with in-depth accounts for the various models plus accessories on the market and descriptions of the many innovations that amateurs have made to optimize their telescopes' performance.
