## **Neural Network Learning Theoretical Foundations:**

**Neural Network Learning** Martin Anthony, Peter L. Bartlett, 1999-11-04 This work explores probabilistic models of supervised learning problems and addresses the key statistical and computational questions. Chapters survey research on pattern classification with binary output networks including a discussion of the relevance of the Vapnik-Chervonenkis dimension and of estimates of the dimension for several neural network models. In addition, the authors develop a model of classification by real output networks and demonstrate the usefulness of classification.
