Neural Grafting United States. Congress. Office of Technology Assessment,1990 Cerebral Ischemia and Basic Mechanisms Alexander Hartmann,Frank Yatsu,Wolfgang Kuschinsky,2012-12-06 In this volume one of a series of monographs devoted to the problems of cerebral ischemia and related topics we present the proceedings of an international conference on Cerebral Ischemia and Basic Mechanisms held in Bad Schachen Lake Constance Germany in June 1992 The enormous progress in research recently on the basic mechanisms associated with cerebral ischemia has provided greater insight into the pathophysiological mechanisms of reduced brain perfusion and decreased cerebral metabolism The high technology instrumentation used to unravel the intricacies of cerebral blood flow and metabolism includes positron emission tomography and magnetic resonance imaging A description of sophisticated neurophysiological techniques will give the reader insight into new models of reversible and irreversible tissue damage and changes at the molecular level have been described The therapeutic approaches which have developed from this research have been or will be used in clinical trials and will open new avenues in the treatment of stroke The organizers of the meeting would like to thank the advisory board for its helpful suggestions and the Deutsche Forschungsgemeinschaft and other sponsors for their important support

Molecular Genetics in Medicine D.F. Roberts,1991-06-18 A report of the proceedings of the Galton Institute's symposium which explored ethical legal political and psychological problems arising within advances in molecular genetics It concentrates on the applications of molecular genetic techniques in clinical genetics Neural grafting : repairing the brain and spinal cord. , Indwelling Neural Implants William M. Reichert,2007-12-17 Despite enormous advances made in the development of external effector prosthetics over the last quarter century significant questions remain especially those concerning signal degradation that occurs with chronically implanted neuroelectrodes Offering contributions from pioneering researchers in neuroprosthetics and tissue repair Indwel *Mechanisms of Secondary Brain Damage from Trauma and Ischemia* A. Baethmann,J. Eriskat,J. Lehmberg,N. Plesnila,2012-12-06 Top level clinical and laboratory scientists present their most recent clinical and experimental findings and concepts The well balanced contributions illustrate the enormous significance of the dialogue between both laboratory and clinic ultimately for the benefit of the patients and contribute to a better understanding of secondary brain damage from trauma and ischemia as basis to develop more effective treatment including drugs 中國香港中文大學新亞書院,1996 **Neural Regeneration and**

Although knowledge of the development and differentiation of glial cells has significantly increased in recent years there are still many questions unanswered The first section of the book is devoted to this very active topic and includes contributions on Schwann cells oligodendrocytes astroglia and microglia The second section of the book covers cellular interactions the role they play on myelination and remyelination how these interactions take place and the molecules involved The third section of this volume focuses on the interactions of neurons with glial cells and their role in brain function Neuron glia cross talk appears to be fundamental for synaptic transmission and several chapters in this section address this topic The topic of how glial cells react to brain injury and how they participate in neuroprotection and brain repair is covered in section four of this book As our knowledge about the molecules involved in the regenerative properties of glia increases new avenues are open for the use of genetically modified glia with therapeutic purposes The final section of the book is devoted to therapeutic approaches to tumours viral and prion infections Gene therapy is a promising approach for the treatment of gliomas one of the most devastating forms of cancer A chapter on prion diseases and microglia addresses a question of tremendous actuality since prion diseases in cows is at this moment the major veterinary problem in Europe and has created a considerable social alarm

Fedoroff, Bernhard H.J. Juurlink, J. Ronald Doucette, 2013-06-29 This volume is made up of papers presented at the Second International Altschul Symposium Biology and Pathology of Astrocyte Neuron Interactions The symposium was held in Saskatoon Canada at the University of Saskatchewan in May 1992 in memory of Rudolf Altschul a graduate of the University of Prague and a pioneer in the fields of the biology of the vascular and nervous systems Dr Altschul was Professor and Head of the Department of Anatomy at the University of Saskatchewan from 1955 to 1963 The Altschul Symposia were made possible by an endowment left by Anni Altschul and by other contributions The symposia are held biennially One of the greatest challenges for present day scientists is to uncover the mechanisms of brain function Although cellular anatomy of the nervous system has already been well outlined and indeed was delineated by the beginning of the century experimental analysis of the function of the brain is relatively recent The framework of the brain is made up of stellate cells the astrocytes which are interconnected by means of their processes thus presenting a meshwork through which the neurons send their axons accompanied by oligodendrocytes Microglia are distributed throughout the brain Bioelectromagnetics ,1991 Official journal of the Bioelectromagnetics Society and the European Bioelectromagnetics Association Also the official bioelectromagnetics journal of the Society for Physical Regulation in Biology and Medicine Specializes in reporting original data on biological effects and applications of electromagnetic fields that range in frequency from zero hertz static fields to the terahertz undulations of visible light Both experimental and clinical data are of interest to the journal s readers as are theoretical papers or reviews that offer novel insights into or criticism of contemporary concepts and theories of field body interactions
