Neurodynamics Of Personality:

Neurodynamics of Personality Jim Grigsby, David Stevens, 2000-01-01 How is each individual's unique personality formed? What is it about personality that can change and why is change often so slow? Promising approaches to these perennial questions are suggested by the explosion of recent research in neuroscience and brain functioning. This timely volume presents a coherent empirically based and clinically useful framework for understanding personality. Jim Grigsby and David Stevens illuminate links between the organization of the brain and the unfolding of personality and show how different aspects of personality are mediated by the brain's nonconscious learning and memory systems. Providing new insights for clinicians, students, and researchers, this book builds a critical bridge between existing psychological theories of personality and emerging knowledge in clinical neuroscience.

Die Arbeit mit Selbstanteilen in der Traumatherapie Janina Fisher, 2019-02-28 Selbst-Entfremdung überwinden vom Trauma heilen. Auf traumatische Ereignisse reagieren Menschen mit Verhaltensmustern, die es ihnen ermöglichen, das Erlebte auszuhalten. Oftmals entstehen dabei traumaassoziierte Selbstanteile. Sobald diese getriggert werden, bestimmen sie das Verhalten der Person. Ausgehend von der Systemischen Therapie mit der inneren Familie und der Sensesmotorischen Psychotherapie erläutert Janina Fisher, wie traumatisierte Klienten in der Therapie lernen können, ihre Selbstanteile zu erkennen und zu werten. Werden diese nämlich mit ihren Bedürfnissen wahrgenommen und berücksichtigt, reduziert sich die Gefahr automatischer Verteidigungs- und Reaktionsmuster. Das Konzept der sicheren Bindung wird auf die innerpsychischen Beziehungen zwischen Selbstanteilen übertragen. So kann Heilung gelingen.

Brain View Hans-Georg Häusel, 2016-04-19 Warum hat das Knacken eines Kekses mehr Einfluss auf die Kaufentscheidung, als der Konsument ahnt? Weil die meisten Kaufentscheidungen auf unbewussten Programmen beruhen. Brain View erklärt, nach welchen Regeln diese Programme im Gehirn des Kunden ablaufen. Lernen Sie Ihre Kunden aus einer neuen Perspektive kennen und finden Sie neue Wege zu effektiverem Marketing für Produkte und Dienstleistungen. Inhalte: Wie Kaufentscheidungen im Kopf wirklich fallen. Gehirngerechte Verkaufsflächen im Handel. Wie starke Marken im Gehirn entstehen und wie sie wirken. Beispiele aus der Praxis für die Umsetzung in Marketing und Verkauf. Aktualisierungen nach neuesten Erkenntnissen der Hirnforschung. NEU! Wenn neue Technik auf altes Gehirn trifft. Digital Brain.

Psychotherapy, Psychodynamic / Object Relations Jeffrey J. Magnavita,2002-10-01 Now available in paperback In this volume different approaches to Psychodynamic Object Relations approaches are examined It covers the important issues in the field with topics ranging from psychodynamic psychotherapy with undergraduate and graduate students to a relational feminist psychodynamic approach to sexual desire to psychodynamic object relations group therapy with schizophrenic patients Self-Organizing Complexity in Psychological Systems Craig Piers,John P. Muller,Joseph Brent,2007-04-18 This

volume addresses itself to the ways in which the so called new sciences of complexity can deepen and broaden neurobiological and psychological theories of mind Complexity theory has gained increasing attention over the past 20 years across diverse areas of inquiry including mathematics physics economics biology and the social sciences Complexity theory concerns itself with how nonlinear dynamical systems evolve and change over time and draws on research arising from chaos theory self organization artificial intelligence and cellular automata to name a few This emerging discipline shows many points of convergence with psychological theory and practice emphasizing that history is irreversible and discontinuous that small early interventions can have large and unexpected later effects that each life trajectory is unique yet patterned that measurement error is not random and cannot be justifiably distributed equally across experimental conditions that a system s collective and coordinated organization is emergent and often arises from simple components in interaction and that change is more likely to emerge under conditions of optimal turbulence *Psychology of the Spirit* John G. Shobris,Holly A.

Shobris,2015-09-10 While not all aspects of Carl Gustav Jung s work have aged well many of his ideas remain consistent with current concepts in behavioral psychology and neuroscience Psychology of the Spirit reviews the lasting effects of Jung s work and how it integrates with modern neuroscience cognitive and behavioral studies and Christian theology It combines the mystical insights developed by Eastern Orthodox Christian theology with Jung s vision of the psyche and the concept of the collective unconscious and its archetypes Though written as a contribution to the field of psychology and as a tool for clinical practice it is also accessible to lay readers interested in the relationship between the mind and the brain **The I and Being Human** Norman Holland,2017-07-05 The I in the title pertains to the core of self that persists over time These are challenges that elude people like social scientists philosophers or critics of literature and the arts who would chronicle or explain humanity s doings This informative engaging and joyous book by Norman N Holland offers a usable model for the aesthetics psychology history and science of the human subject Holland begins by modeling the self as a theme and variations constant yet constantly changing He shows how symbolization perception cognition and memory all contribute to the sense of I hence how any one I grows out of a specific history and culture but also out of experiences all humans share Holland proposes a scientific psychology based on his model fusing the experiments of academic psychology with the insights of psychoanalysis He illustrates his theory by the lives of George Bernard Shaw Scott Fitzgerald and other writers as well as Freud s patient Little Hans in adulthood a famed stage director at the Metropolitan Opera The I and Being Human attempts nothing less than to draw together aspects of the self such as objectivity and subjectivity that have eluded connection In so doing Norman Holland offers a rereading of psychoanalysis as a theory of the I Rewired Paul N. Markham,2007-07-01 Rewired begins with the claim that contemporary views of Christian spirituality particularly in the American evangelical tradition concentrate too exclusively on the interior and individual nature of spiritual experience Paul Markham argues that a reexamination of the doctrine of religious conversion is needed within American evangelicalism and finds resources for such a model in the Wesleyan theological tradition and from philosophical and scientific insights into a nonreductive physicalist view of human nature In considering data from theology and science this book represents an integrated work in science and religion Self-Injury in Youth Mary K. Nixon,Nancy L. Heath,2008-07-11 This edited volume features evidence based reviews and practical approaches for the professional in the hospital clinic community and school with case examples throughout Divided into five major sections the book offers background historical and cultural information discussion of self injury etiology assessment and intervention prevention issues and relevant resources for those working with youths who self injure *Trauma and Memory* Valerie Sinason,Ashley Conway,2021-08-11 Trauma and Memory will assist mental health experts and professionals as well as the interested public in understanding the scientific issues around trauma memory and how this differs from other areas of memory This book provides accounts of the damage caused to psychology and survivors internationally by false memory groups and ideas It is unequivocally passionate about the truth of trauma memory and

exposing the damaging disinformation that can seep into the field Contributors to this book include leading professionals from the field of criminology law psychology and psychotherapy in the UK and USA along with survivor professionals who understand only too well the damage such disinformation can cause This book is a valuable resource for mental health professionals of all disciplines including those involved with relevant law and public health policy It will also help survivors and survivor professionals in gaining insight into the forces resisting disclosure

The Haunted Self Onno van der Hart, Ellert R. S. Nijenhuis, Kathy Steele, 2014-09-02 Life is an ongoing struggle for patients who have been chronically traumatized They typically have a wide array of symptoms often classified under different combinations of comorbidity which can make assessment and treatment complicated and confusing for the therapist Many patients have substantial problems with daily living and relationships including serious intrapsychic conflicts and maladaptive coping strategies Their suffering essentially relates to a terrifying and painful past that haunts them Even when survivors attempt to hide their distress beneath a facade of normality a common strategy therapists often feel besieged by their many symptoms and serious pain Small wonder that many survivors of chronic traumatization have seen several therapists with little if any gains and that quite a few have been labeled as untreatable or resistant In this book three leading researchers and clinicians share what they have learned from treating and studying chronically traumatized individuals across more than 65 years of collective experience Based on the theory of structural dissociation of the personality in combination with a Janetian psychology of action the authors have developed a model of phase oriented treatment that focuses on the identification and treatment of structural dissociation and related maladaptive mental and behavioral actions The foundation of this approach is to support patients in learning more effective mental and behavioral actions that will enable them to become more adaptive in life and to resolve their structural dissociation This principle implies an overall therapeutic goal of raising the integrative capacity in order to cope with the demands of daily life and deal with the haunting remnants of the past with the unfinished business of traumatic memories Of interest to clinicians students of clinical psychology and psychiatry as well as to researchers all those interested in adult survivors of chronic child abuse and neglect will find helpful insights and tools that may make the treatment more effective and efficient and more tolerable for the suffering patient

Psychoanalytic Terms and Concepts Elizabeth L. Auchincloss, Eslee Samberg, American Psychoanalytic Association, 2012-10-30 This is the first revised expanded and updated edition of Psychoanalytic Terms and Concepts since its third edition in 1990 It presents a scholarly exposition of English language psychoanalytic terms and concepts including those from all contemporary schools of theory and practice Each entry starts with a brief definition that is followed by an explanation of the significance of the term concept for psychoanalysis its historical development and the present day controversies about best usage

The Neurodynamic Soul Grant Gillett,Walter Glannon,2023-12-19 This book is an analysis and discussion of the soul as a psychophysical process and its role in mental representation meaning understanding and agency Grant Gillett and Walter Glannon combine contemporary neuroscience and philosophy to address fundamental issues about human existence and living and acting in the world Based in part on Aristotle s hylomorphism and model of the psyche their approach is informed by a neuroscientific model of the brain as a dynamic organ in which patterns of neural oscillation and synchronization are shaped by biological social and cultural factors inside and outside of it The authors provide a richer and more robust account of the soul or mind than other accounts by framing it in neuroscientific and philosophical terms that do not explain it away but explain it as something that is shaped by how it responds to the natural and social environment in enabling flexible and adaptive behavior
