Neurology A Queen Square Textbook:

Neurology Charles Clarke, Robin Howard, Martin Rossor, Simon Shorvon, 2011-09-09 *Neurology A Queen Square Textbook* is a remarkable fusion of modern neuroscience with traditional neurology that will inform and intrigue trainee and experienced neurologists alike. Modern neuroscience has penetrated exciting and diverse frontiers into the causes, diagnosis and treatment of neurological disease. Clinical neurology, whilst greatly enhanced by dramatic advances in molecular biology, genetics, neurochemistry and physiology, remains deeply rooted in practical traditions: the history from the patient and the elicitation of physical signs. Neurologists, neuroscientists and neurosurgeons working at Queen Square and advised by an international editorial team have combined their expertise and experience to produce this unique text. The synthesis of clinical neurology with translational research provides a fresh perspective which is Practical Multidisciplinary Translational Integrative. The blend of new science and proven practice underpins this creative approach towards investigating and improving the care of patients suffering from neurological diseases. About Queen Square: The world-renowned National Hospital for Neurology and Neurosurgery and UCL Institute of Neurology, based in Queen Square, London, have an international reputation for training, research and patient care. Research at both institutions leads to developments in translational medicine that are transforming the treatment of neurological disease.

Neurology Robin Howard, Dimitri Kullmann, David Werring, Michael Zandi, 2024-05-06 *neurology A* fully updated and authoritative neurology resource. The Queen Square Textbook has established itself as a favourite companion to clinical neurosciences training and teaching around the world whilst retaining its role as an invaluable reference guide for physicians and other healthcare professionals working in neurology, general medicine and related specialties. The book continues to reflect the core values essential to the practice of clinical neurology in the 21st century. The third edition has been extensively revised and updated to take account of the rapid pace of progress in the neurosciences and patient care. Contemporary neurology has been changed by the COVID 19 pandemic, the climate emergency and the growing inequalities in healthcare resources. The new edition has been extensively revised to reflect these challenges and affords a greater emphasis on management and rehabilitation whilst continuing to reflect the coherence of a text produced from a single, closely knit centre of excellence. Highlights of the new edition include: An updated approach to clinical examination, decision making and diagnosis; New developments in neuroimmunology, pathology and genetics; Neuropalliative care; Ethical and legal issues in clinical neurology; The latest developments in the understanding and management of stroke, movement disorders, epilepsy, cognitive impairment, multiple sclerosis, infections, myelopathy, anterior horn cell disease, disorders of nerve and muscle, neuro-oncology, neurological disorders of hearing, balance and vision, and the neurological care of critical illness, sleep, neuropsychiatry, pain, autonomic and urological disorders. An emphasis on treatment and rehabilitation of the person with a neurological disease. The new edition marks a significant transition to reflect contemporary neurological practice during uncertain times. It mirrors the enormous changes in

investigation diagnosis and treatment that have occurred in recent years whilst maintaining the underlying principle that we do not treat diagnoses but rather we care for people affected by neurological disease
