Neuromanagement Nestor Braidot:

Moral Neuroeducation for a Democratic and Pluralistic Society Patrici Calvo, Javier Gracia-Calandín, 2020-01-27

This book brings together a group of top scholars on ethics and moral neuroeducation to cover the specific field of moral learning. Although there are many studies on neural bases of human learning and the application processes in different fields of human activity such as education, economics or politics, very few of them have delved into the specific field of moral learning. This book brings forward a discursive and cordial ethical concept suitable for the theoretical/practical development of moral neuroeducation as well as a set of guidelines for the design of an educational model that based on moral neuroeducation contributes to the resolution of social problems and the eradication of undesirable patterns and behaviors such as hate speech, corruption, intolerance, nepotism, aporophobia or xenophobia. Furthermore, it contains a management approach for the application of this educational model to the different areas of activity involved in social and human development. A must read for students, educators and researchers in the field of moral philosophy, applied ethics, ethics and any other discipline working with reciprocity, economics, politics, health, etc.

Neuromanagement Nueva Edición Néstor Braidot, 2014-07-18 Cuando las fórmulas y recetas no funcionan cuando no encontramos soluciones en las metodologías aprendidas surge el Neuromanagement como el verdadero desafío para crear y conducir organizaciones de avanzada Aplicar la neurociencia a la gestión empresarial exige que los especialistas en neurociencia piensen acerca del mundo de los negocios y a su vez que los hombres de negocios reflexionen acerca del mundo de la neurociencia Neuromanagement contiene una sólida base interdisciplinaria para aquellos que deseen atravesar ese puente porque Néstor Braidot ha sido capaz de crear un nuevo campo de estudios y fundamentalmente de trazar un camino para que otros puedan continuarlo Néstor ha realizado un excelente trabajo para simplificar y clarificar brindando ejemplos concretos y relevantes al mundo de los negocios Espero que este libro resulte ser la piedra angular tanto

para estudiantes como para practicantes de Neuroliderazgo y Neuromarketing David Rock Ph D Author global consultant and founder of the NeuroLeadership summit La mayor parte de las técnicas que utilizan las empresas para comprender la conducta de las personas se basan en la reflexión consciente Sin embargo la ciencia ha demostrado que la mayoría de las decisiones que tomamos se originan en procesos cerebrales no conscientes y que estos pueden ser estudiados mediante neuroimágenes y otros recursos no invasivos como la evaluación del funcionamiento del sistema nervioso autónomo Tal como lo hizo en Neuromarketing neuroeconomía y negocios en esta obra el Dr Braidot aborda en forma amena y precisa el enorme campo de aplicaciones de las neurociencias en las organizaciones y explica cómo este avance puede optimizar tanto su conducción como el funcionamiento de sus áreas clave Daniel Cardinali Médico y doctor en Ciencias Biológicas doctor honoris causa en Medicina por la Universidad Complutense de Madrid y doctor honoris causa en Medicina por la Universidad de Salamanca He tenido la fortuna de probar personalmente y junto a mi equipo de Huntsman en Europa los nuevos conceptos que Néstor Braidot desarrolla en este su nuevo libro y creo que estamos frente a una nueva dimensión en cuanto a herramientas para el liderazgo y la conducción de organizaciones con beneficios tanto en el orden empresarial como personal Creo que experimentar y vivir este nuevo enfoque aporta una gran claridad y sosiego en el negocio y la toma de decisiones de todos los días lo que nos lleva al éxito y equilibrio personal Lo recomiendo muy especialmente Francis Merinos Director de ventas para España Francia Portugal y Benelux Huntsman Tioxide
