an ever increasing number of countries joining the space bandwagon space is getting congested and competitive

International legislation on space though well meaning is largely viewed to be inadequate to address the concerns of

equitable access to space and more alarmingly is reticent on the issue of militarisation and weaponisation The Indian

presence in the global space order is rather significant Ranking sixth globally in terms of space budget and technological ca

pability India is capable of going beyond its calling Its multi dimensional space programme spans almost the entire spectrum

from space launch to satellite construction and their employment in a large array of development centric applications and in

recent years in missions beyond the Earth The Mangalyaan mission to Mars currently underway symbolises India s

indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at

the global level India thus stands today technologically robust and self reliant well poised in the global space order to look

beyond its domestic charter and address the concerns of the international global community Space legislation situational

awareness and international cooperation in space security are some of the geostrategic options analysed in this book which

Green Innovation in China Joanna I Lewis, 2012-11-27 As the greatest coal producing and consuming nation in the world China would seem an unlikely haven for wind power Yet the country now boasts a world class industry that promises to make low carbon technology more affordable and available to all Conducting an empirical study of China's remarkable transition and the possibility of replicating their model elsewhere Joanna I Lewis adds greater depth to a theoretical understanding of China's technological innovation systems and its current and future role in a globalized economy Lewis focuses on China's specific methods of international technology transfer its forms of international cooperation and competition and its implementation of effective policies promoting the development of a home grown industry Just a decade ago China maintained only a handful of operating wind turbines all imported from Europe and the United States Today the country is the largest wind power market in the world with turbines made almost exclusively in its own factories Following this shift reveals how China's political leaders have responded to domestic energy challenges and how they may confront encroaching climate change The nation's escalation of its wind power use also demonstrates China's ability to leapfrog to cleaner energy technologies an option equally viable for other developing countries hoping to bypass gradual industrialization and the technological lock in of hydrocarbon intensive energy infrastructure Though setbacks are possible China could one day come to dominate global wind turbine sales becoming a hub of technological innovation and a major instigator of low carbon economic change
