Wild Wild Web A User's Playbook to Navigating the Internet's Trickiest Terrains is a readable guide addressing the malicious behaviors within internet cultures. Written in simple and jargon-free language, the book describes ten pillars of information security risks faced by all internet users. Each pillar will be detailed as a story starting with the roots of the problem and branching out into tangential related issues and topics. Each chapter ends by detailing ways a user can avoid falling victim to cyber threats. It uses a combination of news articles, topical current events, and previously published academic research to underpin the ideas and navigates how users interact with the World Wide Web. The book aims to create a generation of internet-literate readers who can spot the pitfalls of the internet in their personal and professional lives to surf the web safely. This guide will appeal to any individual interested in internet safety with a potential readership extending to students and professionals in the fields of computer science, information systems, cybersecurity, business management, human resources, psychology, medicine, education, law, and policy.

The Future of Higher Education in an Age of Artificial Intelligence Stephen Murgatroyd, 2024-07-05 Colleges, universities, and other higher education institutions are displaying a high degree of uncertainty and caution with respect to the adoption and use of AI. Concerns related to security, privacy, and academic misconduct act as cautions, though some are pioneering imaginative and creative uses of AI in teaching, learning, assessment, and support services. This book explores the landscape of AI adoption and suggests ways in which AI can be deployed to improve learning and assessment. It also examines ethical and change management implications of AI. A strong focus on ethical AI, the use of AI for regenerative thinking, and a shift to problem- and project-based learning are all explored as ways of overcoming faculty concerns. This future-focused book is recommended for policy makers in government leadership teams in colleges, polytechnics, and universities and for graduate students seeking to make sense of the fast-moving landscape.
