The Ninety-Nines Inc., 1996-06 **Higher and Faster** Robert M. White, Jack L. Summers, 2014-01-10 In 1961, pilot Robert M. White flew a hypersonic rocket-powered airplane six times faster than the speed of sound and higher than 300,000 feet above the Earth's surface. This is his story. Tracing his childhood on the rough streets of Manhattan during the Depression, his years as a pilot and POW during World War II, his service in Korea and Vietnam, and his rise as an experimental test pilot in the Air Force, this autobiography is a testament to the role of persistence and excellence in the life of a man whose aeronautical feats are now legend. It is the portrait of an extraordinary man in pursuit of the American dream and a glimpse into a remarkable time in America's aviation history.

Rocket Age George D. Morgan, 2020-06-09 Rocket Age traces the history of spaceflight innovation from Robert Goddard's early experiments with liquid fuel rockets through World War II and the work of Wernher von Braun and his German engineers on to the postwar improvements made by Sergei Korolev and his team in the Soviet Union, and culminating with the historic Moon walk made by Neil Armstrong and Buzz Aldrin on July 20, 1969. From designers to engineers and even communication specialists and the builders who assembled these towering rockets, hundreds of thousands of people worked on getting humans to the Moon, yet only a few have been recognized for their contributions. George D. Morgan sets the record straight by giving these forgotten figures of space travel their due. The son of rocket scientists who worked directly on NASA projects Mercury, Gemini and Apollo, Morgan gives behind-the-scenes details on the famous missions, including a rare interview with Dieter Huzel, Wernher von Braun's right hand man and a chief engineer on every major manned space program. Even the most voracious readers of US space flight history will discover things in this book that they have never read before. Rocket Age shines a light on those that have for too long been left out of the picture of the race to land on the Moon.
