Neoliberalisms War On Higher Education:

Neoliberalism's War on Higher Education Henry A. Giroux, 2014 Addresses what educators young people and concerned citizens can do to reclaim higher education from market driven neoliberal ideologies **Neoliberalism's War on Higher Education** Henry A. Giroux, 2019-12-03 An accessible examination of neoliberalism and its effects on higher education and America by the author of American Nightmare Neoliberalism's War on Higher Education reveals how neoliberal policies practices and modes of material and symbolic violence have radically reshaped the mission and practice of higher education short changing a generation of young people Giroux exposes the corporate forces at play and charts a clear minded and inspired course of action out of the shadows of market driven education policy Championing the youth around the globe who have dared to resist the bartering of their future he calls upon public intellectuals as well as all people concerned about the future of democracy to speak out and defend the university as a site of critical learning and democratic promise Giroux has focused his keen intellect on the hostile corporate takeover of higher education in North America He is relentless in his defense of a society that requires its citizenry to place its cultural political and economic institutions in context so they can be interrogated and held truly accountable We are fortunate to have such a prolific writer and deep thinker to challenge us all Karen Lewis President Chicago Teachers Union No one has been better than Giroux at analyzing the many ways in which neoliberalism has damaged the American economy and undermined its democratic processes Bob Herbert Distinguished Senior Fellow at Demos Giroux dares us to reevaluate the significance of public pedagogy as integral to any viable notion of democratic participation and social responsibility Anybody who is remotely interested in the plight of future generations must read this book Dr Brad Evans Director Histories of Violence website **The School Story** David Aitchison, 2022-02-04 The School Story Young Adult Narratives in the Age of Neoliberalism examines the work of contemporary writers filmmakers and critics who reflecting on the realm of school experience help to shape dominant ideas of school The creations discussed are mostly stories for children and young adults David Aitchison looks at serious novels for teens including Laurie Halse Anderson's Speak and Faiza Guane's Kiffe Kiffe Tomorrow the light hearted middle grade fiction of Andrew Clements and Tommy Greenwald and Malala Yousafzai's autobiography for young readers I Am Malala He also responds to stories that take young people as their primary subjects in such novels as Sapphire's Push and films including Battle Royale and Cooties Though ranging widely in their accounts of young life such stories betray a mounting sense of crisis in education around the world especially in terms of equity the extent to which students from diverse backgrounds have fair chances of receiving quality education and empowerment the extent to which diverse students are encouraged to gain strength confidence and selfhood as learners Drawing particular attention to the influence of neoliberal initiatives on school experience this book considers what it means when learning and success are measured more and more by entrepreneurship competitive individualism and marketplace gains Attentive to the ways in which power structures

institutional routines school spaces and social relations operate in the contemporary school story The School Story offers provocative insights into a genre that speaks profoundly to the increasingly precarious position of education in the twenty first century *Politics of Quality Improvement in English Further Education* Zahid Naz,2023-01-12 This book offers a rich account of how quality improvement agendas informed by neoliberalism create contradictory and complex contexts in which teachers produce different types of practices for specific purposes Drawing on Michel Foucault's analytical tools archaeology and genealogy this book weaves together findings from classroom observations field notes and interviews to explore the dichotomies between practices focussing on day to day pedagogies and practices concerned with performance management and accountability initiatives By attending to a Foucauldian conception of power and counter conduct it explores new means of defining quality in teaching spaces After considering existing quality assurance judgements the book illuminates the significance of moving slightly away from an institutionalised enterprise culture and loosening relations with reductionist approaches as a starting point While doing so it reworks the idea of quality by presenting other ways of looking at the complex character of pedagogical realities with new insights into an emergentist and process oriented conception of teaching practices The book argues that we need to unlearn our existing knowledge of quality that overlooks contextual constraints and opportunities enmeshed in teaching practices It questions the assumptions that the existing methods of observation are capable of quantifying the quality of education in a classroom or in a college in toto By introducing the idea of documentisation the book breaks new theoretical ground to show that this so called system of robust accountabilities is not as self evident as we believe and why we must rethink quality by unthinking our current common sense Written for researchers in educational studies practising teachers and policy makers this book combines profound insights from theory and contemporary teaching practices with clear guidelines as to how educational policy making should be approached

The Future of University Education Michał Izak, Monika Kostera, Michał Zawadzki, 2017-04-26 This collected volume of essays offers glimpses of the future of university education While universities consider the spirit of theoretical exchange and intellectual pursuit to be a defining trait of their identity this book argues that this heritage is disappearing under the influence of the short term demands of societies and markets Universities used to be sites of dissent civil courage and societal conscience but have now instead become little more than pseudo businesses rendering them incapable of remaining critical or independent However with more people going to university every year there is a strong resistance to the notion that the university as a collegial and critical institution is dead among academics as well as the broader public With contributions from scholars across the world this edited collection explores the ramifications of marketization on universities and provides glimpses of what higher education will look like in the future It will be of great interest to teachers and students in higher education as well as policy makers and those interested in the current and future state of higher education The Future of American Higher Education Joseph L. DeVitis, 2023-07-03 This impressive anthology presents the reader with an

introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields Both the latter and the public intellectuals themselves are responding to the state of American higher education Importantly most of them there are a few public intellectuals in the book who cling closer to the status quo do not separate colleges and universities from the political economic and social currents of American society They attack the realities of growing social inequality the intractable presence of institutional racism and the recurrent reliance on the free market as the arbiter of value Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education They force the reader to consider serious challenges to the current arrangement of higher learning and as such they ask us to assess the efficacy of their respective perspectives Do they present the reader with insight or idealism pathways or dead ends This compendium provides an abundance of ideas for higher education leaders policy makers faculty members trustees and governmental officials as well as social theorists and graduate students interested in higher education careers Richard Guarasci President Emeritus of Wagner College Just as our society is polarized higher education is no less divided as to its mission and purpose whether it should be preparing students for employment or for engagement as citizens whether it should be corporatist and profit driven or promote intellectual curiosity and independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book review the contributions of seventeen public intellectuals who have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field Public Intellectuals Presented Stanley Aronowitz Michael B. The Attack on Higher Education Ronald G. Musto, 2022-01-20 American higher education is under attack today as never before A growing right wing narrative portrays academia as corrupt irrelevant costly and dangerous to both students and the nation Budget cuts attacks on liberal arts and humanities disciplines faculty layoffs and retrenchments technology displacements corporatization and campus closings have accelerated over the past decade In this timely volume Ronald

Musto draws on historical precedent Henry VIII's dissolution of British monasteries in the 1530s for his study of the current threats to American higher education. He shows how a triad of forces: authority, separateness, and innovation enabled monasteries to succeed and then suddenly and unexpectedly to fail. Musto applies this analogy to contemporary academia. Despite higher education's vital centrality to American culture and economy, a powerful anti-liberal narrative is severely damaging its reputation among parents, voters, and politicians. Musto offers a comprehensive account of this narrative from the mid-twentieth century to the present, as well as a new set of arguments to counter criticisms and rebuild the image of higher education.

The Palgrave Handbook of Crisis Leadership in Higher Education Jürgen Rudolph, Joseph Crawford, Choon-Yin Sam, Shannon Tan, 2024-06-04. This handbook provides a frame of reference for the global challenges facing higher education leadership today. Focusing on recommendations and directions for the future rather than simply a recap of measures taken during the COVID-19 pandemic, the contributors also delve into contexts such as the climate crisis, issues of diversity, equity, and inclusion, digitalisation, funding, and marketisation, the war in Ukraine, and China, Taiwan, and Hong Kong tensions. They collate a systematic global view of higher education systems during the pandemic and beyond and explore possibilities for the future, providing recommendations for the new normal. With contributions from across six continents, the book will be of interest to students and scholars of higher education and governance, university leaders, government, and accreditation bodies, and anyone else interested in reflecting on the past few years in higher education and the road ahead.

The Role of Neoliberalism in the Marketisation of Higher Education Gerbrand Tholen, 2024-09-11. This book assesses to what extent marketisation in Higher Education can be attributed to Neoliberalism. Higher education sectors in many countries have increasingly relied on market mechanisms in their management and functioning, particularly in their provision of education. Many assume that Neoliberalism, with its pursuit of free markets and competition, is the key driver. Neoliberalism continues to be a popular concept to describe the social, political, and economic worlds around us, but there is little consensus on how it should be defined or understood. The book argues that there is a clear scope for the use of Neoliberalism to describe the direction HE is shifting towards, but it is rather inadequate on its own and not applicable in all areas.

Higher Education Governance in East Asia Jung Cheol Shin, 2018-10-01. This book deepens our understanding of how higher education governance has recently changed in the rapidly developing higher education systems of East Asia. Focusing on China, Japan, Korea, Malaysia, and Taiwan, it explains the implications of how state-centered political systems interpret political and economic environments such as neoliberalism, as well as how each system is coping with global pressures. The book makes a valuable contribution to organization studies in higher education by investigating and detailing how individual higher education institutions are responding to their new environments.

Catastrophe and Higher Education Jeffrey R. Di Leo, 2020-12-11. This book asks what it means to live in a higher educational world continuously tempered by catastrophe. Many of the resources for response and resistance to catastrophe have long been identified by

thinkers ranging from Ralph Waldo Emerson and William James to H G Wells and Emanuel Haldeman Julius Di Leo posits that hope and resistance are possible if we are willing to resist a form of pessimism that already appears to be drawing us into its arms Catastrophe and Higher Education argues that the future of the humanities is tied to the fate of theory as a form of resistance to neoliberalism in higher education It also offers that the fate of the academy may very well be in the hands of humanities scholars who are tasked with either rejecting theory and philosophy in times of catastrophe or embracing it

Hopeful Pedagogies in Higher Education Mike Seal,2021-05-20 Many accounts of critical pedagogy particularly accounts of trying to enact it within higher education HE express a deep cynicism about whether it is possible to counter the ever creeping hegemony of neo liberalism neo conservatism and new managerialism within Universities Hopeful Pedagogies in Higher Education acknowledges some of these criticisms but attempts to rescue critical pedagogy locating some of its associated pessimism as misreading of Freire and offering hopeful avenues for new theory and practice These misreadings are also located in the present in the assumption that unless change comes within the lifetime of the project it has somehow failed Instead this book argues that a positive utopianism is possible Present actions need to be celebrated and cultivated as symbols of hope possibility and generativity for the future which the concept of hope implies The contributors make the case for celebrating the pedagogies of HE that operate in liminal spaces situated in the spaces between the present and the future between the world as it is and the world as it could be and also in the cracks that are beginning to show in the dominant discourses *Neoliberalism, Economic Radicalism, and the Normalization of Violence* Vicente Berdayes,John W.

Murphy,2015-12-11 This compelling volume analyzes the wide scale societal impact of neoliberal economic policy on contemporary life and behavior Synthesizing perspectives from politics and economics with insights from psychology and linguistics it argues that market driven public institutions promote antisocial thinking discourage critical reflection and inure individuals to inequity and cruelty Chapters cite the ubiquity of violence in modern society from the marketing of the military to impersonal mass upheavals in the job market as devaluing human worth and thus self worth But the editors also assert that these currents are not terminal and the book concludes by identifying conditions potentially leading to a more civil and egalitarian future Included in the coverage The language of current economics social theory the market and the disappearance of relationships Neoliberalism and education the disfiguration of students Slicing up societies commercial media and the destruction of social environments Neoliberalism and the transformation of work Economics the network society and the ontology of violence A new economic order without violence Given the centrality of economic events on the global stage Neoliberalism Economic Radicalism and the Normalization of Violence stands out as both a springboard for discussion and a call to action to be read by political and cultural economists political scientists and sociologists

Transforming our World Through Design, Diversity and Education Gerald Craddock,Cormac Doran,Larry McNutt,Dónal Rice,2018-10-15 Good design is enabling and each and every one of us is a designer Universal Design is widely

recognized an important concept that should be incorporated in all person centred policies The United Nations Convention on the Rights of Persons with Disabilities UNCRPD clearly stipulates that the most effective way of delivering on the promise of an inclusive society is through a Universal Design approach Sitting at the intersection of the fields of Higher Education and Universal Design this book presents papers delivered at the Universal Design and Higher Education in Transformation Congress UDHEIT2018 held in Dublin Ireland from 30 October to 2 November 2018 This event brings together key experts from industry education and government and non government organization sectors to share experiences and knowledge with all participants The 86 papers included here are grouped under 17 headings or themes ranging from education and digital learning through healthcare to engagement with industry and urban design Celebrating and integrating all that is good in design diversity and education this book will be a valuable resource for all those interested in the inspiring and empowering developments in both Universal Design and higher education

The Englishization of Higher Education in Europe

Robert Wilkinson, René Gabriels, 2025-10-01 The introduction of English as a medium of instruction EMI has changed higher education enormously in many European countries This development is increasingly encapsulated under the term Englishization that is the increasing dispersion of English as a means of communication in non Anglophone contexts Englishization is not undisputed legal challenges have arisen in several countries Nor is it uniform universities across Europe embrace Englishization but they do so in their own way In this volume authors from 15 European countries present analyses from a range of perspectives coalescing around core concerns the quality of education cultural identity inequality of opportunities and access questions of justice and democracy and internationalization and language policy This book will appeal to researchers in applied linguistics sociolinguistics educational sciences and political science as well as policy makers and people with a concern about the direction of higher education

Just Universities Gerald J. Beyer, 2021-02-23 Gerald J Beyer's *Just Universities* discusses ways that U S Catholic institutions of higher education have embodied or failed to embody Catholic social teaching in their campus policies and practices Beyer argues that the corporatization of the university has infected U S higher education with hyper individualistic models and practices that hinder the ability of Catholic institutions to create an environment imbued with bedrock values and principles of Catholic Social Teaching such as respect for human rights solidarity and justice Beyer problematizes corporatized higher education and shows how it has adversely affected efforts at Catholic schools to promote worker justice on campus equitable admissions financial aid retention policies diversity and inclusion policies that treat people of color women and LGBTQ persons as full community members just investment and stewardship of resources and the environment

Engaging Higher Education Curricula Elmarie Costandius, 2015-06-30 The authors aim to stimulate discussion about the nature and purposes of critical citizenship education in higher education Rather than promoting a blueprint for change the authors thoughtfully consider a generative research agenda for transformative higher education and focus on how this orientation in higher education plays out on the ground This book together with its Coda that takes the conversation beyond critical citizenship education to include responsible citizenship provides compelling reasons and sound suggestions for a way forward

Decolonising African University Knowledges, Volume 2 Amasa P. Ndofirepi, Felix Maringe, Simon Vurayai, Gloria Erima, 2022-10-14 This book explores the influence of neoliberal globalisation on African higher education considering the impact of the politics of neoliberal ideology on the nature and sources of knowledge in African universities Written by African scholars the book engages with debates around the commodification of knowledge socially just knowledge knowledge transformation collaboration and partnerships and indigenous knowledge systems It challenges the neoliberal approach to knowledge production and dissemination in African universities and contributes to debates around decolonising knowledge production in Africa The chapters draw on experiences from universities in different sub-Saharan countries to show how the manifestation of neo-colonialism through the pursuit of the hegemonic neoliberal philosophy is impacting on decolonising university knowledge in Africa Providing a unique critique of the impact of neoliberal higher education in Africa the book will be essential reading for researchers scholars and postgraduate students in the field of Sociology of Education decolonising education Inclusive Education and Education Policy

Higher Education under Late Capitalism Jeffrey R. Di Leo, 2017-02-07 This book explores questions concerning personal identity and individual conduct within neoliberal academe The author suggests that neoliberal academe is normal academe in the new millennium though well aware of its contested nature and

destructive capacities Examining higher education through a number of ideals such as austerity and transparency brings readers on a journey into its present as well as its past If some of these ideals can be identified and critiqued there is a chance that the foundations of neoliberal academe can be weakened This book actively pursues pathways out of the neoliberal abyss and offers that demanding a role for pleasure in higher education may be one of them
