Differential Geometry and Complex Analysis I. Chavel, H.M. Farkas, 2012-12-06 This volume is dedicated to the memory of Harry Ernest Rauch who died suddenly on June 18 1979 In organizing the volume we solicited i articles summarizing Rauch's own work in differential geometry complex analysis and theta functions ii articles which would give the reader an idea of the depth and breadth of Rauch's researches interests and influence in the fields he investigated and iii articles of high scientific quality which would be of general interest In each of the areas to which Rauch made significant contribution pinching theorems teichmüller theory and theta functions as they apply to Riemann surfaces there has been substantial progress Our hope is that the volume conveys the originality of Rauch's own work the continuing vitality of the fields he influenced and the enduring respect for and tribute to him and his accomplishments in the mathematical community Finally it is a pleasure to thank the Department of Mathematics of the Graduate School of the City University of New York for their logistical support James Rauch who helped us with the biography and Springer Verlag for all their efforts in producing this volume Isaac Chavel Hershel M Farkas Contents Harry Ernest Rauch Biographical Sketch VII Bibliography of the Publications of H E Rauch X Ph D Theses Written under the Supervision of H E Rauch XIII H E Rauch Geometrie Differentiel by M Berger *Differential Geometrical Methods in Mathematical Physics* P.
