NHS plc Allyson M. Pollock, 2020-05-05 Universal comprehensive health care equally available to all and disconnected from income and the ability to pay was the goal of the founders of the National Health Service This book by one of the NHS's most eloquent and passionate defenders tells the story of how that ideal has been progressively eroded and how the clock is being turned back to pre NHS days when health care was a commodity fully available only to those with money How this has come about to the point where even the shrinking core of free NHS hospital services is being handed over to private providers at the taxpayers expense is still not widely understood hidden behind slogans like care in the community diversity and local ownership Allyson Pollock demystifies these terms and in doing so presents a clear and powerful analysis of the transition from a comprehensive and universal service to New Labour's mixed economy of health care in which hospitals with foundation status loosely supervised by an independent regulator will be run on largely market principles The NHS remains popular Pollock argues precisely because it created the freedom from fear that its founders promised and because its integrated non commercial character meant low costs and good medical practice Restoring these values in today's health service has become an urgent necessity and this book will be a key resource for everyone wishing to bring this about

The JSE Handbook, 1998 *The Report: South Africa 2008*, *International Trade in Services*

Olivier Cattaneo, Michael Engman, Sebastian Sez, Robert M. Stern, 2010-06-24 The services sector is key to economic growth competitiveness and poverty alleviation Comprising more than two thirds of the world economy services are now commonly traded across borders helped by technological progress and the increased mobility of persons In recent years a number of

developing countries have looked at trade in services as a means to both respond to domestic supply shortages and to diversify and boost exports Any country can tap into the trade potential of services but not every country can become a services hub across sectors The opening of the services sector potentially comes with large benefits but also fears and costs that should not be overlooked This book provides useful guidelines for the assessment of a country's trade potential and a roadmap for successful opening and export promotion in select services sectors It looks at both the effects of increased imports and exports and provides concrete examples of developing country approaches that have either succeeded or failed to maximize the benefits and minimize the risks of opening It focuses on sectors that have been rarely analyzed through the trade lens and or have a fast growing trade potential for developing countries These sectors are accounting construction distribution engineering environmental health information technology and legal services This book is designed for non trade specialists to understand how trade can help improve access to key services in developing countries and for trade specialists to understand the specific characteristics of each individual sector It will be a useful tool for governments to design successful trade opening or promotion strategies and for the private sector and consumers to advocate sound domestic policy reforms accompanying an offensive trade agenda
