

Networking in the Digital Age

The digital age has ushered in a transformative era of networking, reshaping the way we connect, communicate, and cultivate opportunities. In this era of constant connectivity, traditional boundaries have blurred, and the landscape of networking has expanded exponentially. The internet, coupled with an array of online platforms and tools, including the Digital Business Card, has revolutionized how individuals and professionals interact, collaborate, and forge relationships.

Networking, once confined to face-to-face meetings and physical events, has evolved into a dynamic digital realm where geography is no longer a barrier. Online networking platforms, such as social media, professional networking sites, and specialized forums, have become integral to our personal and professional lives.

Mohamed A. Ramady,2015-11-23 The term wasta stems from the Arabic root for middle or medium and describes the phenomenon of using connections to find job government services or other favors to circumvent bureaucracy or bypass the system as a whole The effects of wasta may be both positive or negative and is not a phenomenon that is particular to the Arab or Muslim world but also to many other cultures and regions of the world with similar concepts popularly known as ubuntu guanxi harambee naoberschop or old boy network used in African Chinese and European societies By its very nature wasta is an area of grey or even black information and like corruption to which it is most often associated is hard to assess although country corruption perception indexes attempt to provide a quantifiable basis In the final analysis such ratings are

based on perceptions of corruption and this perception may vary strongly depending on different societal structures and cultural modes whether these are extended family systems tribal clans or more atomized societies where relationships are essentially transactional and rule based In a western perspective where wasta may be considered as a form of corruption in other societies it may be perceived as something natural and not criminal and using one's wasta in tribal societies to help clan members is seen as a duty The difference stems from the innocent use of wasta to make introductions as opposed to its abuse in placing unqualified persons in positions The volume brings together academics and professional experts to examine a range of multi faceted social economic and political issues raised by the use and abuse of social networking covering various topics like wasta interpersonal connections in family and business ties The relationship between inequality adjusted human development and corruption perception indexes in the Gulf region wasta and business networking assessing the economic cost of wasta wasta and its impact on quality oriented education reform and the perceptions of young people The use of wasta to overcome socio cultural barriers for women and men The volume also offers insights into social relations and ethics and how the use of wasta contradicts with common held religious principles along with some country studies on Islamic principles and the use of wasta Mohamed Ramady is a Visiting Associate Professor King Fahd University of Petroleum and Minerals Saudi Arabia
