Neurobehavioral Consequences Of Closed Head Injury:

Neurobehavioral Consequences of Closed Head Injury Harvey S. Levin, Arthur Lester Benton, Robert G. Grossman, 1982
The first extensive critical review of the neurobehavioral sequelae of closed head injury the book's strengths include breadth of coverage stringent attention to methodological issues and objectivity of critical analyses clearly written concise well organized Journal of Clinical Neuropsychology Well conceived and well executed Belongs on the shelf of every practicing neurosurgeon neurologist psychologist and psychiatrist The New England Journal of Medicine Sprachstörungen nach Schädelhirntrauma Renate Drechsler, 1997 **Neurobehavioral Recovery from Head Injury** Harvey S. Levin, 1987 This volume will repay the reader with a greatly enhanced understanding of the challenge facing head injured patients when they try to return to society The Lancet **Clinical and Neuropsychological Aspects of Closed Head Injury** Dr J Richardson, 2013-11-12 In all industrialised countries closed head injuries are responsible for vast numbers of hospital admissions and days of work lost For instance about 120 000 patients are admitted to hospital in the United Kingdom each year with a diagnosis that reflects closed head injury Such injuries are a major cause of deaths following accidents especially those that involve children and young people and they are also a major cause of handicap and morbidity among the survivors This clinical condition is intrinsically a neurological one but its proper evaluation demands an understanding of the associated psychology and psychopathology At the same time a major neurological condition with such a high level of incidence ought to be extremely informative about the functioning of the human brain and hence provide a major focus for neuropsychological investigation In this book the author seeks to integrate these two different perspectives by reviewing the clinical and neuropsychological aspects of closed head injury in a manner that is equally intelligible to researchers interested in the effects of brain damage upon human behaviour and to practitioners who are responsible for the assessment management and rehabilitation of head injured patients This is the second edition of a book which was first published in 1990 and which has been extensively revised in the light of the subsequent research in the field The book begins by considering the epidemiology causes and structural neuropathology of closed head injury It then considers the impact of closed head injury on memory cognition language communication personality and social behaviour Finally it outlines the outcome the mechanisms of recovery and the prospects for rehabilitation Clinical and Neuropsychological Aspects of Closed Head Injury John T. E. Richardson, 2001-10-04 The book begins by considering the epidemiology causes and structural neuropathology of closed head injury considers the impact of closed head injury and finally details the outcome mechanisms for recovery and rehabilitation **Neurobehavioural Sequelae of Traumatic Brain Injury** Rodger Ll Wood, 1990
Injuries in Athletics: Causes and Consequences Semyon M.
