Proceedings of the Joint 3rd International Conference on Bioinformatics and Data Science (ICBDS 2022) R.

Somashekhar, Preenon Bagchi, T. S. Rajesh, Richard Hill, Kathryn Rossi, 2023-06-05. This is an open access book. We are pleased to announce our 3rd International Conference on Bioinformatics and Data Science (ICBDS 2022) and 9th International Conference on Public Mental Health and Neurosciences (ICPMN 2022), which was a unique conference where we connected Biological Function through Computational Genomics to the world of integrated medicine and therapeutics. Functional genomics is a field of molecular biology that attempts to describe gene and protein functions and interactions. This science

aims to understand the complex relationship between genotype and phenotype on a global genome wide scale of different biological processes Most researchers now study genes or regions on a genome wide scale i e all or multiple genes regions at the same time with the hope of narrowing them down to a list of candidate genes or regions to analyze in more detail There are several specific functional genomics approaches depending on what we are focused on DNA level genomics and epigenomics RNA level transcriptomics protein level proteomics metabolite level metabolomics and phenotype level phenomics The recent trends in gene and genome editing technologies promising genomic information can be modulated in the areas of medicine agriculture and environment Big data is a promising in many research areas but still it is computationally challenging and non availability of experts to handle big data with reduced speed and cost With the increasing use of advanced technology and the exploding amount of big data in it is imperative to introduce effective and efficient methods to handle big data using computing technologies The big data analytics technique is required to solve the problems in bioinformatics such as the storage of vast information generated by analyzing the big data Big data analytics can examine large data sets analyze and correlate genomic and proteomic information Big data research finds a huge application in Neuroscience and Brain research Our unique conference connects genomics to the world of genomics to integrated medicine including yogic sciences **Electromagnetic Radiations** Prutha Prashant Kulkarni,Parikshit
