Artificial Intelligence in Vocational Education and Training Selena Chan, 2025-05-30. This book details a series of studies across several levels of learning and vocational education and training. VET discipline areas. In the main, the advent of natural language AI chatbots, exemplified by ChatGPT, has caused the educational sector to take on a defensive stance. Both schools and the higher education sector are engaged in an on-going arms race to prevent learners from using AI to augment assessments. Therefore, there has been a focus on plagiarism prevention rather than to better understand the potentialities for utilizing AI to support better learning. This book explores the collaborative development and planning between educational developers, learning designers, and teachers to design learning activities which could leverage off various artificial intelligence AI platforms. In doing so, support is provided for effective learning to be undertaken with an emphasis on the learning and application of critical thinking skills. The studies presented through the volume describe the integration of AI literacy to support learners in evaluating the relevance and efficacy of AI tools and platforms and to understand how to best utilize these for specific purposes. This book also synthesizes a framework for the introduction, selection, and implementation of AI into the VET curriculum. It showcases recommendations and guidelines to inform the future integration of AI tools, platforms into the VET curriculum. *Artificial Intelligence in Education.
