Machines will be able to do these jobs more efficiently accurately and inexpensively But Nicholas Agar warns in this provocative book these developments could result in a radically disempowered humanity The digital revolution has brought us new gadgets and new things to do with them The digital revolution also brings the digital economy with machines capable of doing humans jobs Agar explains that developments in artificial intelligence enable computers to take over not just routine tasks but also the kind of mind work that previously relied on human intellect and that this threatens human agency The solution Agar argues is a hybrid social digital economy The key value of the digital economy is efficiency The key value of the social economy is humanness A social economy would be centered on connections between human minds We should reject some digital automation because machines will always be poor substitutes for humans in roles that involve direct contact with other humans A machine can count out pills and pour out coffee but we want our nurses and baristas to have minds like ours In a hybrid social digital economy people do the jobs for which feelings matter and machines take on data intensive work But humans will have to insist on their relevance in a digital age

Randall Lane, 2014-10-16 The ultimate insider look at the newest titans of tech and what you can learn from their success. In 2007, twenty-one-year-old David Karp launched Tumblr, a simple microblogging platform on a whim. By 2012, it had become one of the top ten online destinations, drawing 170 million visitors. By 2013, Yahoo had acquired Tumblr for over 1 billion. Just like that, a kid who hadn't even earned his high school diploma was worth over a quarter billion dollars. And he's not the only one. Silicon Valley's newest billionaires represent a unique and unconventional breed of entrepreneur: young, bold, and taking the world by storm with their extreme speed, insatiable hunger, and progressive leadership. These whiz kids, and to be fair, a few adults, have the hottest companies in the world. They are all turning just one brilliant insight or hook into money at a rate never before seen in human history, creating companies that even with no revenue garner insane valuations. With unique insider access to the world's most influential and wealthy entrepreneurs, Forbes has dug in to find what these super entrepreneurs say about their own success. This book, introduced, edited, and updated by Forbes editor Randall Lane, is the first comprehensive look at who these instant tech billionaires are and how they achieved their quick wins. With sixteen illuminating pieces, including two never before published features, we get behind the scenes: examinations of the founders of Spotify, Airbnb, Tumblr, Twitter, and more, including Elon Musk, the billionaire founder of PayPal, electric carmaker Tesla, and private space company SpaceX. His extreme ambition is matched by his preternatural engineering mind; no wonder he was the model for Robert Downey Jr.'s portrayal of Iron Man. Evan Spiegel, the twenty-three-year-old, declined a 3 billion cash offer from Mark Zuckerberg after making the mountain come to Mohammed. Snapchat's HQ is in Los Angeles; an unheard-of request from a young gun to one of the biggest players in Silicon Valley. The story of Snapchat's origin is even wilder than Facebook's, but Spiegel's ability to parlay infamy and popularity into revenue is still up in the air, even as Snapchat's valuation continues to grow. Alex Karp, an eccentric philosopher with almost no tech background, turned a Peter Thiel-backed venture, Palantir, into a data mining champion with clients like the NSA, the FBI, and the CIA. Amid heated privacy concerns, Karp continues to grow Palantir like crazy: to 196 million in funding and an estimated 1 billion in contracts in 2014. **You Only Have to Be Right Once** is the definitive collection of everything we can learn from these

incredible game changers and what their next moves spell for the future of business
