Science Experiments Tiktok Review:

Künstliche Intelligenz, Mensch und Gesellschaft Michael Heinlein, Norbert Huchler, 2024-04-05 Künstliche Intelligenz KI stellt eine Schlüsseltechnologie des gesellschaftlichen Wandels im 21. Jahrhundert dar. Mittlerweile werden zahlreiche technologische Anwendungen genutzt, die auf maschinellem Lernen und den damit verbundenen Möglichkeiten der Datensammlung, Nutzung und Verwertung aufbauen. Indem KI große Datenmengen beherrschbar und verborgene Muster und Zusammenhänge sichtbar macht, wird vieles schneller, einfacher und effizienter, sei es im Alltag in der Arbeit oder in Organisationen. Offen bleibt jedoch nach wie vor die Frage, welche tiefgreifenden und teilweise latenten Folgen für den Menschen als soziales Wesen und das gesellschaftliche Zusammenleben mit dem Einsatz und der Entwicklung von KI verbunden sind. Wie wandelt sich das Verhältnis von Mensch und Technik durch KI, und wie ist dieser Wandel zu bewerten? Welche Chancen, aber auch Risiken eröffnen sich durch den Einsatz und die Entwicklung von KI für Mensch und Gesellschaft? Welchen Grenzen unterliegt der Wandel, und welche Gestaltungsmöglichkeiten bieten sich? Und nicht zuletzt: Was und wer bestimmt die Entwicklungspfade, die KI nimmt, mit welchen Folgen und für wen? **Digital Responses to Covid-19**

Christian Hovestadt, Jan Recker, Janek Richter, Karl Werder, 2021-03-10 This book presents ten essays that examine the potential of digital responses to the COVID-19 pandemic. The essays explore new digital concepts for learning and teaching, provide an overview of organizational responses to the crisis through digital technologies, and examine digital solutions developed to manage the crisis. Scientists from many disciplines work together in the fight against the virus and its numerous consequences. This book explores how information systems researchers can contribute to these global efforts. The book will be of interest to researchers and scholars in the field of digital business and education. **Artificial Intelligence in**

Society Michael Heinlein, Norbert Huchler, 2024-12-27 Artificial Intelligence (AI) represents a key technology for social change in the 21st century. Numerous technological applications are now in use that are based on machine learning and the associated possibilities for data collection, use, and exploitation. By making large amounts of data manageable and hidden patterns and connections visible, AI makes many things faster, easier, and more efficient, be it in everyday life, at work, or in organizations. However, the question remains open as to what profound and sometimes latent consequences for humans as social beings and social coexistence are associated with the use and development of AI. How is the relationship between people and technology changing through AI, and how should this change be assessed? What opportunities and risks do the use and development of AI open up for people and society? What are the limits of change, and what design options are available? And last but not least: What and who determines the development paths that AI takes, with what consequences, and for whom? Some of the articles in this volume have been automatically translated into English by Springer machine translation by the service DeepL.com. The contributions were then thoroughly revised, corrected, and supplemented by the authors. The authors are therefore responsible not only for the content but also for the linguistic form of the articles. Nevertheless, the text of the

book may differ stylistically from a conventional translation **Post-Anthropocene Civic and Global Education Studies**
Peter Appelbaum, 2024-10-08 This book explores community action within our more than human lifeworld tackling post Anthropocene challenges It presents bold experiments shifting from crisis study to asking How are we here It addresses key issues by moving beyond posthuman perspectives integrating indigenous ways of being resisting Doomer Culture and rejecting blind Hopeism Part 1 focuses on Post Anthropocene Pedagogies from an Education Studies perspective Part 2 illustrates the power of these pedagogies while Part 3 delves into literature on Post Anthropocene Education Part 4 illustrates the approach via case studies of teaching the development of an NGO and community art projects The narrative emphasizes maintaining a two way flow between human culture and nature highlighting porous boundaries It argues that mere knowledge won't cure or save the world Instead it advocates for leadership and civic engagement that enrich reconnection with place and stewardship The primary audience is within environmental education sustainability studies curriculum studies post human studies sociology of education and resource management as educational enterprise
