Six Summers - A Memoir Vincent Tipre, 2007-08 The legendary writer Patricia Highsmith is best remembered today for her chilling psychological thrillers The Talented Mr Ripley and Strangers on a Train A critically acclaimed best seller in Europe Highsmith has for too long been underappreciated in the United States Starting in 2011 Grove Press will begin to reissue nine of Highsmith s works Eleven is Highsmith s first collection of short stories an arresting group of dark masterpieces of obsession and foreboding violence and instability Here naturalists meet gruesome ends and unhinged heroes disturb our sympathies This is a captivating important collection from one of the truly brilliant short story writers of the twentieth century Otto Penzler

Teacher Michael Copperman, 2016-08-25 When Michael Copperman left Stanford University for the Mississippi Delta in 2002 he imagined he would lift underprivileged children from the narrow horizons of rural poverty Well meaning but naive the Asian American from the West Coast soon lost his bearings in a world divided between black and white He had no idea how to manage a classroom or help children navigate the considerable challenges they faced In trying to help students he often found he couldn t afford to give what they required sometimes with heartbreaking consequences His desperate efforts to save child after child were misguided but sincere He offered children the best invitations to success he could manage But he still felt like an outsider who was failing the children and himself Teach For America has for a decade been the nation s largest employer of recent college graduates but has come under increasing criticism in recent years even as it has grown exponentially This memoir considers the distance between the idealism of the organization s creed that One day all children in this nation will have the opportunity to attain an excellent education and reach their full potential and what it actually means to teach in America s poorest and most troubled public

schools Copperman's memoir vividly captures his disorientation in the divided world of the Delta even as the author marvels at the wit and resilience of the children in his classroom To them he is at once an authority figure and a stranger minority than even they are a lone Asian an outsider among outsiders His journey is of great relevance to teachers administrators and parents longing for quality education in America His frank story shows that the solutions for impoverished schools are far from simple

Mathematical Subjects Fiona Walls, 2009-08-10 Teaching and learning mathematics is a political act in which children teachers parents and policy makers are made visible as subjects As they learn about mathematics children are also learning about themselves who they are who they might become We can choose to listen or not to what children have to say about learning mathematics Such choices constitute us in relations of power Mathematical know how is widely regarded as essential not only to the life chances of individuals but also to the health of communities and the economic well being of nations With the globalisation of education in an increasingly market oriented world mathematics has received intensified attention in the first decade of the twenty first century with a shifting emphasis on utilitarian aspects of mathematics This is reflected in the reconceptualisation of mathematical competence as mathematical literacy loosely conceived as those ways of thinking reasoning and working mathematically that allow us to engage effectively in everyday situations in many occupations and the cut and thrust of world economies as active empowered and participatory citizens It is no surprise then that mathematics has become one of the most politically charged subjects in primary school curricula worldwide We are experiencing an unprecedented proliferation of regional and national strategies to establish benchmarks raise standards enhance achievement close gaps and leave no child behind in mathematics education Industries have sprung up around the design administration and monitoring of standardised assessment to measure and compare children's mathematical achievement against identified benchmarks and each other

Latinos/as and Mathematics Education Kip Téllez, Judit N. Moschkovich, Marta Civil, 2011-05-01 This book that explores the mathematics education of Latinos as in 13 original research studies Each chapter represents research that grounds mathematics instruction for Latinos as in the resources to be found in culture and language By inverting the deficit perspective this volume redresses the shortcomings found in the previous literature on Latino learners Each study frames language e.g. bilingualism not as an obstacle to learning but as a resource for mathematical reasoning Other chapters explore the notion of cultural variation not as a liability but as a tool for educators to build upon in the teaching of mathematics Specifically the book reframes culture as a focus on the practices objects inscriptions or people that connect mathematical concepts to student thinking and experiences both in and out of school The book's four sections divide the research The first section of the book focuses on mathematic learning in classrooms specifically exploring bilingual Latino students the second section explores Latino learners in communities including the role parents can play in advancing learning the third section includes chapters focused on teacher professional growth the final section concerns the assessment and mis assessment of Latino learners The research shared in this volume

provides ample evidence that mathematics educators who choose to ignore language or culture in their pedagogy risk shortchanging their Latino students

The Cell of a Soul Maria Logven, 2008-10 Maria Logven's short stories entwine daydream with desire action with inner fantasy and prose with verse in an enchanting vision In her story Trapped in Love Logven's narrator is thrown into the turmoil of lost relationship when memories of what once was bubble through daily ritual and make believe Created personalities are given to passengers on the train imbued with secret lives of the narrator's making The text skips through perambulations of a mind rich in imagination the likes of which compares to Alice's trip down the rabbit hole Logven's tales offer a most seductive opportunity to escape the daily grind Eve Rifkah editor of Diner a literary journal

The Discipline of Hope Herbert R. Kohl, 1998 It has been thirty years since Herbert Kohl taught the sixth grade Harlem class he wrote about in his classic 36 Children He has been teaching ever since in kindergarten through graduate school as he has pursued his lifelong work with children adolescents college age students and education professionals In The Discipline of Hope Kohl examines teaching as a vocation and as a skill and examines his own love affair with it He provides insight into how learning takes place in the widest range of circumstances both in and out of a formal school setting He demonstrates how schools and other centers of learning can be transformed so that they become places that nurture children while instilling discipline and how they can help students meet high academic standards develop a sense of respect for themselves and others and grow into successful adults Central to this book and at the core of the act of teaching as Kohl describes it is what he calls the discipline of hope the stubborn refusal to accept limits on what students can learn or what teachers can do by helping them discover the power of their minds At a time when so many are complacent or skeptical about the possibilities of education this book with the experiences it describes of teacher and taught is an affirmation that provides guideposts insight and wisdom
