Performance Evaluation and Benchmarking Raghunath Nambiar, Meikel Poess, 2022-01-14 This book constitutes the refereed post conference proceedings of the 13th TPC Technology Conference on Performance Evaluation and Benchmarking TPCTC 2021 held in August 2021 The 9 papers presented were carefully reviewed and selected from numerous submissions The TPC encourages researchers and industry experts to present and debate novel ideas and methodologies in performance evaluation measurement and characterization **Architecture of Computing Systems** Martin Schulz, Carsten

Trinitis, Nikela Papadopoulou, Thilo Pionteck, 2022-12-13 This book constitutes the proceedings of the 35th International Conference on Architecture of Computing Systems ARCS 2022 held virtually in July 2022 The 18 full papers in this volume were carefully reviewed and selected from 35 submissions ARCS provides a platform covering newly emerging and cross cutting topics such as autonomous and ubiquitous systems reconfigurable computing and acceleration neural networks and artificial intelligence The selected papers cover a variety of topics from the ARCS core domains including energy efficiency applied machine learning hardware and software system security reliable and fault tolerant systems and organic computing

High Performance Computing in Clouds Edson Borin, Lúcia Maria A. Drummond, Jean-Luc Gaudiot, Alba Melo, Maicon Melo Alves, Philippe Olivier Alexandre Navaux, 2023-07-05 This book brings a thorough explanation on the path needed to use cloud computing technologies to run High Performance Computing HPC applications Besides presenting the motivation behind moving HPC applications to the cloud it covers both essential and advanced issues on this topic such as deploying HPC applications and infrastructures designing cloud friendly HPC applications and optimizing a provisioned cloud infrastructure to run this family of applications Additionally this book also describes the best practices to maintain and keep running HPC applications in the cloud by employing fault tolerance techniques and avoiding resource wastage To give practical meaning to topics covered in this book it brings some case studies where HPC applications used in relevant scientific areas like Bioinformatics and Oil and Gas industry were moved to the cloud Moreover it also discusses how to train deep learning models in the cloud elucidating the key components and aspects necessary to train these models via different types of services offered by cloud providers Despite the vast bibliography about cloud computing and HPC to the best of our knowledge no existing manuscript has comprehensively covered these topics and discussed the steps methods and strategies to execute HPC applications in clouds Therefore we believe this title is useful for IT professionals and students and researchers interested in cutting edge technologies concepts and insights focusing on the use of cloud technologies to run HPC applications *Java Concurrency and Parallelism* Jay Wang, 2024-08-30 Unlock Java's full potential for cloud computing through expert insights from real world case studies and stay ahead with the latest trends in agile and robust Java application development Key Features Master concurrency and parallelism to overcome cloud computing challenges in Java Build scalable solutions with Big Data ML microservices and serverless architectures Explore cloud scaling GPU utilization

and future tech innovations in Java applications Purchase of the print or Kindle book includes a free PDF eBook Book Description If you're a software developer, architect, or systems engineer exploring Java's concurrency utilities and synchronization in the cloud, this book is an essential resource. Tech visionary Jay Wang, with over three decades of experience transforming industry giants, brings unparalleled expertise to guide you through Java's concurrency and parallel processing in cloud computing. This comprehensive book starts by establishing the foundational concepts of concurrency and parallelism vital for cloud native development and gives you a complete overview, highlighting challenges and best practices. Wang expertly demonstrates Java's role in big data, machine learning, microservices, and serverless computing, shedding light on how Java's tools are effectively utilized in these domains. Complete with practical examples and insights, this book bridges theory with real-world applications, ensuring a holistic understanding of Java in cloud-based scenarios. You'll navigate advanced topics such as synchronizing Java's concurrency with cloud auto scaling and GPU computing and be equipped with the skills and foresight to tackle upcoming trends in cloud technology. This book serves as your roadmap to innovation and excellence in Java cloud applications, giving you in-depth knowledge and hands-on practice for mastering Java in the cloud era. What you will learn: Understand Java concurrency in cloud app development; Get to grips with the core concepts of serverless computing in Java; Boost cloud scaling and performance using Java skills; Implement Java GPU acceleration for advanced computing tasks; Gain insights into Java's role in the evolving cloud and AI technology; Access hands-on exercises for real-world Java applications; Explore diverse Java case studies in tech and fintech; Implement Java in AI-driven cloud and data workflows; Analyze Java's application in IoT and real-time analytics. Who this book is for: This book is for Java developers, software engineers, and cloud architects with intermediate Java knowledge. It's ideal for professionals transitioning to cloud native development or seeking to enhance their concurrent programming skills. DevOps engineers and tech leads involved in cloud migration will also find valuable insights. Basic Java proficiency, familiarity with cloud concepts, and some experience with distributed systems is expected. *Maximum PC*, 2003-11: Maximum PC is the magazine that every computer fanatic, PC gamer, or content creator must read. Contemporary High Performance Computing Jeffrey S. Vetter, 2017-11-23 Contemporary High Performance Computing: From Petascale toward Exascale focuses on the ecosystems surrounding the world's leading centers for high performance computing (HPC). It covers many of the important factors involved in each ecosystem: computer architectures, software, applications, facilities, and sponsors. The first part of the book examines significant trends in HPC systems, including computer architectures, applications, performance, and software. It discusses the growth from terascale to petascale computing.

and the influence of the TOP500 and Green500 lists The second part of the book provides a comprehensive overview of 18 HPC ecosystems from around the world Each chapter in this section describes programmatic motivation for HPC and their important applications a flagship HPC system overview covering computer architecture system software programming systems storage visualization and analytics support and an overview of their data center facility The last part of the book addresses the role of clouds and grids in HPC including chapters on the Magellan FutureGrid and LLGrid projects With contributions from top researchers directly involved in designing deploying and using these supercomputing systems this book captures a global picture of the state of the art in HPC
