Unwritten Danny Knobler, 2019-04-09 Don t bunt in a blowout Don t pimp your home runs Act like you ve been here before In Unwritten Bat Flips the Fun Police and Baseball s New Future national baseball writer Danny Knobler dives deep beyond the

brushbacks and brawls to examine shifting attitudes towards Major League Baseball's once sacred player codes. What emerges in the process is a much larger story: one of a more youthful, more exuberant, more diverse game in the midst of a fascinating culture clash. Featuring countless interviews with some of baseball's biggest names, including current and former major league players, coaches, scouts, and journalists, *Unwritten* is a revealing, thoroughly researched portrait of a sport grappling with the loaded question of what it means to play the game the right way. Fans will not want to miss these varied inside perspectives on America's pastime marching into the future.

Driverless Cars, Urban Parking and Land Use Robert A. Simons, 2020-02-05. The subject of driverless and even ownerless cars has the potential to be the most disruptive technology for real estate, land use, and parking since the invention of the elevator. This book includes new research and economic analysis plus a thorough review of the current literature to pose and attempt to answer a number of important questions about the effect that driverless vehicles may have on land use in the United States, especially on parking. Simons outlines the history of disruptive technologies in transport and real estate before examining how the predicted changes brought in by the adoption of driverless technologies and decline in car ownership will affect our urban areas. What could we do with all the parking areas in our cities and our homes and institutional buildings that may no longer be required? Can they be sustainably repurposed? Will self-driving cars become like horses, used only by hobbyists for recreation and sport? While the focus is on parking, the book also contains the views of real estate economists, architects, and policymakers and is essential reading for real estate developers and investors, transport economists, planners, politicians, and policymakers who need to consider the implications of a future with more driverless vehicles. Fasten your seat belt: like it or not, driverless cars will begin to change the way we move about our cities within ten years.
