Online Maps with APIs and WebServices Michael P. Peterson, 2012-03-30 The Internet has become the major form of map delivery The current presentation of maps is based on the use of online services This session examines developments related to online methods of map delivery particularly Application Programmer Interfaces APIs and MapServices in general including Google Maps API and similar services Map mashups have had a major impact on how spatial information is presented The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world Overlaying features on top of these maps provides a frame of reference for the map user A particular advantage for thematic mapping is the ability to spatially reference thematic data [Pro Web 2.0 Mashups](#) Raymond Yee, 2008-04-25 How many times have you seen a web site and said This would be exactly what I wanted if only If only you could combine the statistics here with data from your company s earnings projections If only you could take the addresses for those restaurants and plot them on one map How often have you entered the date of a concert into your calendar with a single click instead of retyping How often do you wish that you could make all the different parts of your digital world your e mail your word processor documents your photos your search results your maps your presentations work together more seamlessly After all it s all digital and malleable information shouldn t it all just fit together In fact below the surface all the data web sites and applications you use could fit together This book teaches you how to forge those latent connections to make the Web your own by remixing information to create your own mashups A mashup in the words of the Wikipedia is a web site or web application that seamlessly combines content from more than one source 1 into an integrated experience Learning how to draw content from the Web together into new integrated interfaces and applications whether for yourself or for other others is the central concern of this book [Web Cartography](#) Ian Muehlenhaus, 2013-12-10 Web mapping technologies continue to evolve at an incredible pace Technology is but one facet of web map creation however Map design aesthetics and user interactivity are equally important for effective map communication From interactivity to graphical user interface design from symbolization choices to animation and from layout to typeface and color selection Web Cartography offers the first comprehensive overview and guide for designing beautiful and effective web maps for a variety of devices Written for those with a basic understanding of mapmaking but who may not have an in depth knowledge of web design this book explains how to create effective interaction animation and layouts for maps in online and mobile platforms Concept driven this reference emphasizes cartographic principles for web and mobile map design over specific software techniques It focuses on key design concepts that will remain true regardless of software technologies used The book is supplemented with a website providing links to stellar web maps video tutorials and lectures do it yourself labs map critique exercises and links to others tutorials Approachable clear and concise the book provides a nontechnical approachable guide to map design for the web It provides best practices for map communication based on spatial data visualization and graphic

design theory By carefully avoiding overly technical jargon it provides a solid launching pad from which students practitioners and innovators can begin to design aesthetically pleasing and intuitive web maps *Get Up To Speed with Online Marketing* Jon Reed, 2012-09-26 ONLINE MARKETING CAN YOUR SMALL BUSINESS AFFORD TO BE WITHOUT IT Traditional advertising doesn't always work these days and it's expensive People screen out TV ads magazine ads and billboards Instead they're spending time on Facebook watching YouTube reading and writing blogs listening to podcasts and flicking through Twitter As a small business owner how do you get the word out about your product or service By going where your market is And that's online This book explains in a straightforward easy to follow style all there is to know about promoting small businesses online covering all the major online tools available including Websites Search engine marketing Email marketing Blogging Podcasts Online video Social networks e.g. Facebook and MySpace Virtual worlds e.g. Second Life Social bookmarking It will show readers how to use each medium to their best effect on a limited marketing budget if not for free **EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility** Inge

Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e-commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so-called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and

policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject
