*differential equation wikipedia* - Oct 11 2022

web in mathematics a differential equation is an equation that relates one or more unknown functions and their derivatives 1 in applications the functions generally represent physical quantities the derivatives represent their rates of change and the differential equation defines a relationship between the two

differential equation formula meaning formulas solved - Jun 07 2022

web some differential equation formula examples for some function g find another function f such that  $\frac{dy}{dx} = f(x)$  where y f

x this is the differential equation therefore an equation consisting of derivative or derivatives of the dependent variable with respect to the independent variable is called a differential equation
