The Voice Catchers Joseph Turow, 2021-05-18 Your voice as biometric data and how marketers are using it to manipulate you Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that peoples exact locations could be tracked by those devices We now take both for granted Even just a decade ago the idea that individuals voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel Yet a new business sector is emerging to do exactly that The first in depth examination of the voice intelligence industry The Voice Catchers exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis Amazon and Google have numerous patents pertaining to voice profiling and even now their smart speakers are extracting and using voice prints for identification and more Customer service centers are already approaching every caller based on what they conclude a caller s voice reveals about that person s emotions sentiments and personality often in real time In fact many scientists believe that a person s weight height age and race not to mention any illnesses they may have can also be identified from the sound of that individual s voice Ultimately not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective explores its

contemporary developments and offers a clarion call for regulating this rising surveillance regime **Smart Homes in easy steps** Nick Vandome,2018-08-17 Smart Homes in easy steps shows you how to start to take advantage of the current smart technology that is beginning to revolutionise the way in which we run our homes The idea of a smart home using digital devices throughout the home that can be controlled by digital voice assistants apps smartphones and tablets is not a science fiction vision of the future it is very much part of the here and now and available to all Also known as the Internet of Things IoT smart home devices can be used to automate tasks save time and money and to control devices in your home with a touch of a button even when you are somewhere else Smart Homes in easy steps takes the mystery out of all of the elements that are required to set up a smart home it defines a smart home and shows what is needed to make a home smart digital voice assistants devices and apps Initially the book looks at the concept of a smart home and how it is now affordable and accessible enough for it to be a serious option for any household Then setting up items for a smart home is covered in detail installing the devices and also linking them to apps and digital voice assistants for controlling them The book then examines the digital voice assistants that can be used in the home to control smart home devices including detailed information about using the most popular options and their related speakers Alexa and the Amazon Echo Google Assistant and the Google Home and Siri and the Apple HomePod The book then looks at specific areas of smart home devices including installation and setup and how to control them once they are up and running Some of the areas that are covered in detail include Smart lighting Smart heating Smart security systems Smart home cameras Smart locks Smart plugs Illustrated using Amazon Echo and Alexa Google Assistant and Google Home Apple HomePod and the Home app and Nest Smart Homes in easy steps is not a look into the future it is a comprehensive yet concise step by step guide on how to start transforming your home right now using this exciting and now affordable technology for smart learning Contents 1 About Smart Homes 2 About Digital Voice Assistants 3 Alexa and the Amazon Echo 4 Google Assistant and Google Home 5 HomePod and the Home app 6 Using Smart Devices 7 Smart Lighting 8 Smart Heating 9 Smart Security 10 More Smart Home Options 11 Looking Forward

Supercities On, Under, and Beyond the Earth Jeff Dondero,2020-02-08 As more and more people inhabit the Earth and live longer on it Super Cities will explode with populations of 20 30 even 100 millions or more But how will these cities accommodate such masses Who will build them and where How can they be sustained and their inhabitants provided for Here Jeff Dondero imagines the super cities of the future and explores the ways in which they can be sustainably built how transportation will move masses of people without cars how people will be fed and where waste will go and how we will move to cities underground under the sea in the atmosphere into space and on to other planets It describes some of the smart systems for buildings and homes and some of the new ways food and materials enough for such masses will be supplied Will super cities be the answer to our bursting population And if they will how can we best sustain and supply them Dondero offers suggestions and a blueprint for the future **The Smart Home Manual** Marlon Buchanan,2020-10-10 Do you want
