Simulation-based Medical Training Erik Lövquist, 2011-05-25 This volume explores the development process of a Virtual Reality VR and web based medical training system from a user centred perspective It highlights the importance of user participation in this context by analysing two case studies concerned with the development of a VR and web based medical training system for Spinal Anaesthesia It illustrates the relationship between user participation and the development process of a VR and web based medical training system User groups along with their input and degrees of participation and influence are classified It shows how a democratic arrangement between users and developers is beneficial and maybe even mandatory in order to utilise the users guidance efficiently In this arrangement the use of prototypes is instrumental in bridging the expertise and knowledge gap between users and developers Reading this volume may aid other research teams developing VR and web based medical training systems in deciding if why and how to involve relevant user groups in the overall development process

Handbook of the Sociology of Medical Education Caragh Brosnan, Bryan S. Turner, 2009-09-10 The Handbook of the Sociology of Medical Education provides a contemporary introduction to this classic area of sociology by examining the social origin and implications of the epistemological organizational and demographic challenges facing medical education in the twenty first century Beginning with reflections

on the historical and theoretical foundations of the sociology of medical education the collection then focuses on current issues affecting medical students the profession and the faculty before exploring medical education in different national contexts Leading sociologists analyze the intersection of medical education and social structures such as gender ethnicity and disability the effect of changes in medical practice such as the emergence of evidence based medicine on medical education and the ongoing debates surrounding the form and content of medical curricula By examining applied problems within a framework which draws from social theorists such as Pierre Bourdieu this new collection suggests future directions for the sociological study of medical education and for medical education itself
