Codicology and palaeography in the digital age 2 Franz Fischer, Christiane Fritze, Georg Vogeler, 2010 Visualizing Law in the Age of the Digital Baroque Richard K Sherwin, 2012-05-23 Visualizing Law in the Age of the Digital Baroque explores the profound impact that visual digital technologies are having on the practice and theory of law Today lawyers judges and lay jurors face a vast array of visual evidence and visual argument From videos documenting crimes and accidents to computer displays of their digital simulation increasingly the search for fact based justice inside the courtroom is becoming an offshoot of visual meaning making But when law migrates to the screen it lives there as other images do motivating belief and judgment on the basis of visual delight and unconscious fantasies and desires as well as actualities Law as image also shares broader cultural anxieties concerning not only the truth of the image but also the mimetic capacity itself the human ability to represent reality What is real and what is simulation This is the hallmark of the baroque when dreams fold into dreams like immersion in a seemingly endless matrix of digital appearances When fact based justice recedes laws proliferate within a field of uncertainty Left unchecked this condition of ontological and ethical uneasiness threatens the legitimacy of law s claim to power Visualizing Law in the Age of the Digital Baroque offers a jurisprudential paradigm that is equal to the challenge that current cultural conditions present **Management in the Age of Digital Business Complexity** Bill McKelvey, Renata Kaminska, Maria Paz Salmador, Nadine Escoffier, 2021-09-07 Management in the Age of Digital Business Complexity focuses on how the digital age is changing management and vastly speeding up complexity dynamics The recent coevolution of technologies has dramatically changed in just a few years how people and firms learn communicate and behave Consequently the process of how firms coevolve and the speed at which they coevolve has been dramatically changed in the digital age and managerial methods are lagging way behind Combining his own expertise with that of a number of specialist and international co authors McKelvey conveys how companies that fall behind digitally can quickly be driven out of business The book has been created for academics seeking to upgrade management thinking into the modern digital age and vastly improve the change capabilities of firms facing digital oriented competition **The Future is Digital** George Rzevski, 2023-10-30 This book describes in an easily accessible way how artificial intelligence AI will help us to overcome the ongoing rise in complexity and thus shape our lives and work in a not too distant future AI has proven to be the latest tool for resolving issues created by the most recent surge in complexity and the corollary is those who delay or ignore AI will be overwhelmed by complexity The book starts with a broad description of the coevolution of technology and society that irreversibly leads to the sharp increase in complexity of our socioeconomic environment The second chapter then covers concepts and principles of the new science of complexity which helps us to understand issues caused by socioeconomic complexity and provides methods for resolving them Subsequently a beginner s guide to artificial intelligence helps readers

to glance at fundamentals of this powerful technology capable of resolving issues created by socioeconomic complexity The danger of allowing intelligent digital systems to make high risk decisions as well as the consequences of possible misuse of AI for fraud and fake are also discussed The following chapter explores the concepts of natural and digital ecosystems Digital transformation of rigidly structured corporations and administrations into adaptive and evolving organisations are illustrated by a number of case studies Next the current hectic transition of industrial to digital society is described its origins identified and outcomes predicted highlighting issues created by the increase in complexity and showing how to resolve them using thinking tools such as a complexity mindset and digital tools such as artificial intelligence Eventually the last two chapters outline the author's vision of the future digital economy and digital society This book is accessible to everyone who is curious to glimpse into the future no previous special knowledge of digital technology is required Especially decision makers in politics business administration banking policy making education healthcare and defence and their advisors will benefit from the book as it will help them to contribute to the creation of the brave new digital world It may also support investors to recognise which elements of digital technology will play the most important role in the near future

Digital Scholarly Editing Matthew James Driscoll, Elena Pierazzo, 2016-08-15 This volume presents the state of the art in digital scholarly editing Drawing together the work of established and emerging researchers it gives pause at a crucial moment in the history of technology in order to offer a sustained reflection on the practices involved in producing editing and reading digital scholarly editions and the theories that underpin them The unrelenting progress of computer technology has changed the nature of textual scholarship at the most fundamental level the way editors and scholars work the tools they use to do such work and the research questions they attempt to answer have all been affected Each of the essays in *Digital Scholarly Editing* approaches these changes with a different methodological consideration in mind Together they make a compelling case for re-evaluating the foundation of the discipline one that tests its assertions against manuscripts and printed works from across literary history and the globe The sheer breadth of *Digital Scholarly Editing* along with its successful integration of theory and practice help redefine a rapidly changing field as its firm grounding and future looking ambit ensure the work will be an indispensable starting point for further scholarship This collection is essential reading for editors scholars students and readers who are invested in the future of textual scholarship and the digital humanities

On Making in the Digital Humanities Julianne Nyhan, Geoffrey Rockwell, Stéfan Sinclair, Alexandra Ortolja-Baird, 2023-03-13 *On Making in the Digital Humanities* fills a gap in our understanding of digital humanities projects and craft by exploring the processes of making as much as the products that arise from it The volume draws focus to the interwoven layers of human and technological textures that constitute digital humanities scholarship To do this it assembles a group of well known experienced and emerging scholars in the digital humanities to reflect on various forms of making we privilege here the creative and applied side of the digital humanities The volume honours the work of John Bradley as it is totemic of a practice of making that is deeply

informed by critical perspectives A special chapter also honours the profound contributions that this volume's co-editor St fan Sinclair made to the creative applied and intellectual praxis of making and the digital humanities St fan Sinclair passed away on 6 August 2020 The chapters gathered here are individually important but together provide a very human view on what it is to do the digital humanities in the past present and future This book will accordingly be of interest to researchers teachers and students of the digital humanities creative humanities including maker spaces and culture information studies the history of computing and technology and the history of science and the humanities

Archival Materialities in a Digital Age Eirini Goudarouli, Andrew Prescott, 2025-02-27 Materiality looms large in the world of archives in storage conservation and shape or materials of the records How does this materiality change in the digital age The way digital techniques and materialities transform our engagement with archives is highlighted and explored throughout Archival Materialities in a Digital Age

DEPROGRAMMING THE DIGITAL SELF Anshum, 2025-10-10 Deprogramming the Digital Self Conscious Evolution in the Age of Synthetic Intelligence You are no longer just human you are hybrid A consciousness encoded edited and optimized by invisible systems The question is no longer What can technology do but What is it quietly doing to you This book is your mirror and your manual It reveals how algorithms have not only hijacked attention but rewired identity itself then shows you how to reclaim the only frontier left your inner bandwidth Blending digital psychology spiritual sovereignty and cultural philosophy Deprogramming the Digital Self is not another detox guide it's a consciousness upgrade It asks you to stop optimizing for engagement and start evolving for awareness It is a manifesto for those who refuse to be reduced to code Why This Book Exists Because the feed has become the new faith Because your worth is now measured by metrics Because silence has become the rarest luxury and sovereignty the rarest rebellion Technology has rewritten what it means to be human This book rewrites it back Through its eight chapters and a complete appendix of living protocols it offers a psycho-technological roadmap from dependence to self-direction from unconscious programming to conscious creation What You'll Discover Chapter by Chapter Chapter 1 The Age of the Synthetic Self You'll see how the digital mirror replaced the human one Learn how identity evolved from Ego 1.0 tribal belonging to Algorithmic 2.0 data-driven persona and why the next leap Conscious 3.0 is the only path to freedom You'll recognize how your data shadow became your ghost twin and how to reclaim the human behind the metrics Deep awareness of how your sense of self is subtly being shaped and the first steps to reclaim authorship of your own narrative Chapter 2 AI as the New Guru Explore how we've begun to outsource not just decisions but wisdom itself to algorithms When your Spotify knows your moods better than your therapist and your AI assistant predicts your desires who is really guiding your life You'll regain discernment learning to differentiate between artificial guidance and authentic intuition You'll stop letting algorithms become your oracles Chapter 3 The Data Karma Trap Every click leaves an imprint Every scroll becomes a seed This chapter exposes how your digital past creates a form of data karma algorithmic memory that defines your future possibilities It shows how to consciously clear the residue of your online

past and start living beyond predictive profiling Liberation from digital determinism You ll learn practical ways to erase forgive and evolve beyond the algorithm s story of you Chapter 4 Digital Shadows and Human Souls Here you ll meet your digital shadow the persona you project to please the algorithm and the quiet self you ve forgotten underneath it This is the emotional heart of the book confronting the dissonance between who you post and who you are Emotional reconnection You ll begin to live as your authentic self not as your most engageable version Chapter 5 Cognitive Firewalls Protecting Inner Bandwidth Your attention is your true currency This chapter builds the inner architecture to protect it cognitive firewalls that block mental malware emotional manipulation and information overload You ll learn to create time firewalls content quarantines and emotional boundary policies Mental clarity and focus You ll stop being a passive consumer of code and become the conscious curator of your own cognition Chapter 6 Awakening the Non Algorithmic Mind Can a mind be free from pre programmed loops Yes when awareness becomes the operating system This chapter offers meditative reflective and embodied practices to awaken the Non Algorithmic Mind the space of pure choice and observation untouched by predictive design Inner freedom You ll experience what it feels like to act from awareness not impulse to think without being thought through Chapter 7 Building the Conscious Internet Once awareness matures sovereignty must scale This chapter turns the gaze outward toward the digital ecosystems we inhabit collectively It imagines a Conscious Internet transparent decentralized humane You ll learn how to contribute ethically advocate policy change and code systems that honor rather than exploit attention Collective empowerment You ll see how personal awakening can reshape the systems we build use and sustain Chapter 8 From Awakening to Co Creation The Path of Conscious Sovereignty This is where insight becomes embodiment You ll integrate everything mind emotion behavior into a living design for Conscious 3 0 You ll learn to create feedback loops where your inner work ripples outward into your networks workspaces and creative systems You ll audit your legacy code what you ll leave behind digitally and energetically Complete integration You ll evolve from digital consumer to conscious co creator living proof that awareness can outcode automation The Appendices Your Practical Blueprint 1 Digital Deprogramming Protocols Matrix A full synthesis of every practice mental emotional and behavioral arranged in a living roadmap you can apply weekly 2 Tools Resources Curated privacy tools decentralized platforms mindful tech and templates to redesign your digital life 3 Glossary Key Concepts A language for the new human era from Algorithmic Self to Cognitive Firewall 4 8 Week Practice Journey A step by step path from awareness to sovereignty where every week reclaims a new part of your bandwidth What This Book Ultimately Gives You Mental Sovereignty The ability to think beyond algorithmic conditioning Emotional Clarity Freedom from digital overstimulation and the dopamine economy Behavioral Discipline A structure for living consciously in an over connected world Ethical Agency Tools to participate in shaping a more humane digital future Existential Renewal A reconnection with the essence that no machine can simulate awareness itself This book teaches you how to stop being programmed and start becoming the programmer of your own consciousness It is not a

rejection of technology but a re enchantment of humanity Not an escape from the algorithm but an awakening beyond it You are both the deprogrammer and the architect Welcome to Conscious 3 0 **Writing Space** Jay David Bolter,2001 This completely updated volume continues the work of the first edition showing how hypertext and other forms of electronic writing remediate forms genres of print For students in composition technology information studies **Miracles and Wonders in the Middle Ages and Early Modern Period** Albrecht Classen,2025-10-20 Despite the assumption that we live today in a rather rationalist and mechanized world there remain many aspects that neither medicine nor physics can fully explain The Catholic Church continues to pronounce individuals as saints because scientifically confirmed miracles are associated with them If we want to gain a solid understanding of the pre modern history of mentality emotions and everyday culture it proves to be highly revealing to examine what miracles and wonders had meant at that time both in the theological and medical field in the visual arts and literature As a matter of fact people both in the East and in the West have consistently flocked to pilgrimage sites all over the world in the hope that a miracle might happen and solve issues for them The contributors to this volume based on a symposium at the University of Arizona May 2024 approach this critically important topic from many different perspectives taking us from the early Middle Ages to the early modern age examining hagiographical medical literary and alchemical texts discussing both miracles and wonders as relevant themes in the public discourses Both the passage through Inferno and Purgatorio as the crucial pathway toward Paradiso and the experience of women s miraculous conception are identified as deeply impactful for the pre modern world and this both in Christian and Muslim cultures Studying miracles and wonders through a kaleidoscope of different materials and concepts makes it possible to gain a closer understanding of people s mindsets power structures and the debate between medicine and religion These topics were also greatly important in other cultures as several papers on Arabic medieval literature indicate Further pursuing this global issue we recognize easily that the separation line between the Middle Ages and the early modern period is only a modern construct and often not that helpful because the discourse on miracles and wonders has continued and influences even us today **The Digital Arts and Humanities** Charles Travis,Alexander von Lünen,2016-10-25 The case studies in this book illuminate how arts and humanities tropes can aid in contextualizing Digital Arts and Humanities Neogeographic and Social Media activity and data through the creation interpretive schemas to study interactions between visualizations language human behaviour time and place **A Political Theology of Climate Change** Michael S. Northcott,2013-11-30 Cover Dedication Contents Acknowledgements 1 The Geopolitics of a Slow Catastrophe 2 Coal Cosmos and Creation 3 Engineering the Air 4 Carbon Indulgences Ecological Debt and Metabolic Rift 5 The Crisis of Cosmopolitan Reason 6 The Nomos of the Earth and Governing the Anthropocene 7 Revolutionary Messianism and the End of Empire Index

Non-biomedical Perspectives on Pain and its Prevention and Management Mark I. Johnson,James Woodall,Emmanouil Georgiadis ,Antonio Bonacaro,Isobel Jacob,2024-06-06 Overreliance on the biomedical paradigm has contributed in part to

illogical use of surgery and long term opioid medication with harmful physical psychological social and economic consequences Pain literature is dominated by biomedical research at the expense of a holistic understanding of the lived experience of pain Pain practice seems overly consumed with the burden of pain at an individual level patient centred pain management and has neglected exploration of societal level community centred or environmental level ecologically centred solutions **The Digital God** William Indick,2015-03-16 As humans charge up the steep slope of technological innovation digital age media increasingly shapes our perception of everything even spiritual matters The next stage of spiritual development may be the product of a digital interface between our own image of the divine virtual reality technology that produces real perceptions and with devices that stimulate areas of the brain associated with spiritual experience This book explores the influence of digital media on spirituality and the impact of the digital environment on our experience of the spiritual world The author predicts a future in which digital technology and neuroscience will combine to create a new understanding of the divine Instructors considering this book for use in a course may request an examination copy here

Historically Responsive Storytelling Eleanor Chadwick,2023-11-30 This book explores the notion that the emergent language of contemporary theatre and more generally of modern culture has links to much earlier forms of storytelling and an ancient worldview This volume looks at our diverse and amalgamative theatrical inheritance and discusses various practitioners and companies whose work reflects and recapitulates ideas approaches and structures original to theatre s ritual roots Drawing together a range of topics and examples from the early Middle Ages to the modern day Chadwick focuses on a theatrical language which includes an emphasis on the psychosomatic the non linear the symbolic the liminal the collective and the sacred This interdisciplinary work draws on approaches from the fields of anthropology philosophy historical and cognitive phenomenology and neuroscience making the case for the significance of historically responsive modes in theatre practice and more widely in our society and culture *The Annotated Luther, Volume 2* Kirsi I.
