Directory of Grants in the Humanities, 2004 **Grants for Arts, Culture & the Humanities** Foundation Center, 2003-12 **Attitudes & Arabesques**, 1989-11 *Who Owns Religion?* Laurie L. Patton, 2019-11-27

Who Owns Religion focuses on a period the late 1980s through the 1990s when scholars of religion were accused of scandalizing or denigrating the very communities they had imagined themselves honoring through their work. While controversies involving scholarly claims about religion are nothing new this period saw an increase in vitriol that remains with us today. Authors of seemingly arcane studies on subjects like the origins of the idea of Mother Earth or the sexual dynamics of mysticism have been targets of hate mail and book banning campaigns. As a result scholars of religion have struggled to describe their own work to their various publics and even to themselves. Taking the reader through several compelling case studies Patton identifies two trends of the 80s and 90s that fueled that rise: the growth of multicultural identity politics which enabled a form of volatile public debate she terms eruptive public space and the advent of the internet which offered new ways for religious groups to read scholarship and respond publicly. These controversies she shows were also fundamentally about something new: the very rights of secular Western scholarship to interpret religions at all. Patton's book holds out hope that scholars can find a space for their work between the university and the communities they study. Scholars of religion she argues have multiple masters and must move between them while writing histories and speaking about realities that not everyone may be interested in hearing.

Austerity Blues Michael Fabricant, Stephen Brier, 2016-11-01

A generation of budget cutting has eviscerated the very idea of public higher education in America. Public higher education in the postwar era was a key economic and social driver in American life making college available to millions of working men and women. Since the 1980s however government austerity policies and politics have severely reduced public investment in higher education exacerbating inequality among poor and working class students of color as well as part time faculty. In *Austerity Blues* Michael Fabricant and Stephen Brier examine these devastating fiscal retrenchments nationally focusing closely on New York and California both of which were leaders in the historic expansion of public higher education in the postwar years and now are at the forefront of austerity measures. Fabricant and Brier describe the extraordinary growth of public higher education after 1945 thanks largely to state investment, the alternative intellectual and political traditions that defined the 1960s and the social and economic forces that produced austerity policies and inequality beginning in the late 1970s and 1980s. A provocative indictment of the negative impact neoliberal policies have

visited on the public university especially the growth of class racial and gender inequalities Austerity Blues also analyzes the many changes currently sweeping public higher education including the growing use of educational technology online learning and privatization while exploring how these developments hurt students and teachers In its final section the book offers examples of oppositional and emancipatory struggles and practices that can help reimagine public higher education in the future The ways in which factors as diverse as online learning privatization and disinvestment cohere into a single powerful force driving deepening inequality is the central theme of the book Incorporating the differing perspectives of students faculty members and administrators the book reveals how public education has been redefined as a private benefit often outsourced to for profit vendors who sell education back to indebted undergraduates Over the past twenty years tuition and related student debt have climbed precipitously and degree completion rates have dropped Not only has this new austerity threatened public universities ability to educate students Fabricant and Brier argue but it also threatens to undermine the very meaning and purpose of public higher education in offering poor and working class students access to a quality education in a democracy Synthesizing historical sources social science research and contemporary reportage Austerity Blues will be of interest to readers concerned about rising inequality and the decline of public higher education
