Introduction to Nutrition and Health Research Eunsook T. Koh, Willis L. Owen, 2012-12-06. Introduction to Nutrition and Health Research aims to fill a critical gap in dietetics, nutrition, and health education literature by providing a comprehensive guide to conducting research and understanding the research of others. Using actual articles, this book teaches how researchers identified problems, how they framed those problems, and how they reported, interpreted, and implemented their findings. Step by step, the chapters cover an overview of the process, statistical and measurement concepts, types of research including experimental, quasi-experimental, descriptive, and qualitative research, how to present results, and computer techniques for data analysis. While this book is primarily aimed at masters and doctoral level students and beginning researchers, it will also have strong appeal for teachers, technicians, and counselors. [Guide to Reference in Medicine and Health](#) Christa Modschiedler, Denise Beaubien Bennett, 2014-04-26. Drawn from the extensive database of Guide to Reference, this up-to-date resource provides an annotated list of print and electronic biomedical and health-related reference sources, including internet resources and digital image collections. Readers will find relevant research, clinical, and consumer health information resources in such areas as Medicine, Psychiatry, Bioethics, Consumer health and health care, Pharmacology, and pharmaceutical sciences, Dentistry, Public health, Medical jurisprudence, International and global health. Guide to Reference entries are selected and annotated by an editorial team of top reference librarians and are used internationally as a go-to source for identifying information, as well as training reference professionals. Library staff answering health queries, as well as library users undertaking research on their own, will find this an invaluable resource.
