Rogers, 2024-06-25

The leading academic vehicle for scholarly publication in the field of medieval warfare **Medieval Warfare** The articles in volume 22 of the *Journal of Medieval Military History* range widely not only in chronology but also in geography and approach Sven Ekdahl looks at the big picture of the role of Swedish castles in the north L J Andrew Villalon focuses on the very particular and culturally significant rewards given by the Catholic Kings to two noble families to celebrate minor victories on the borders of Granada in the far south Subjects include fighting at the tactical level the unexpectedly substantial tradition of mounted archery in England the Low Countries and France revealed by Sanders Goevarts the operational level Emperor Louis II's logistics in Italy treated by Elijah T Wallace and the strategic level King John's employment of naval power analyzed by Adam M McNeil Vladimir Aleksic and Damjan Prlin evi consider military political geographical demographic and economic factors to contextualize the military history of the rich mining town of Novo Brdo in Serbia as it faced the rising tide of Ottoman conquest in the last century of the Middle Ages Three contributions draw on the rich resources of the English royal archives to illuminate the material and technological tools of medieval warfare individual weapons most significantly both longbows and short bows described with exceptional detail in a murder case of 1315 Clifford J Rogers the horses of Henry V in the Agincourt campaign of 1415 Gary P Baker and the military equipment stored at Dover Castle as described in inventories dating from 1320 to 1437 Dan Spencer

Joan of Arc Scott Manning, 2023-01-09 Joan of Arc is the most recognizable woman from medieval Europe yet the details of her life remain obscure to the general public while heavily debated by specialists Rising from obscurity to insert herself into the court of French King Charles VII before marching with his armies to combat the enemies of the crown during the Hundred Years War she was eventually captured tried in an inquisition and then executed as a relapsed heretic at the age of 19 Joan of Arc A Reference Guide of Her Life and Works focuses on her life and legacy It features a chronology an introduction offers a brief account of her life a dictionary section lists entries on people groups places events topics terms and medieval documents central to Joan's life including her letters contemporary perspectives her condemnation trial and the nullification proceedings eventually blessed by the pope to overturn the verdict of the condemnation trial This book aims to provide an understanding not just of Joan but of the culture that produced and ultimately destroyed her

The Means to Kill Gerrit Dworok, Frank Jacob, 2015-11-12 Throughout human history technological innovation has functioned as a driver of civilization and inspired many people's belief in progress When it comes to warfare where technology is applied with a cruel and deadly logic a nuanced view is needed From siege engines to drones innovation has often served a less enlightened aim elimination of the enemy This collection of new essays from specialists in military history examines the interdependence between war and technology from a number of regional perspectives

Warfare in Medieval Europe c.400-c.1453 Bernard S. Bachrach, David S. Bachrach, 2021-08-30 Warfare in Medieval Europe now in its second edition offers considerably more attention to the transition from the later Roman Empire to the early Middle Ages the composition of the armies of the opponents of the West and the experience of

commanders and individual combatants on the battlefield This second revised and expanded edition provides a more in depth thematic discussion of the nature and conduct of war with an emphasis on its overall impact on society from the late Roman Empire to the end of the Hundred Years War The authors explore the origins of the institutions physical infrastructure and intellectual underpinnings of warfare with chapters on military topography military technology logistics combat and strategy Bernard and David Bachrach have also added a new chapter which provides two detailed campaign narratives that highlight the themes treated throughout the text The geographical scope of the volume encompasses Latin Europe the Slavic World Scandinavia and the eastern Mediterranean with a particular focus on the conflict between Western Christianity and the Islamic Near East Written in an accessible and engaging way Warfare in Medieval Europe is the ideal resource for all students of the history of medieval warfare

The Eurasian Way of War David A. Graff, 2016-03-10 This book is a comparative study of military practice in Sui Tang China and the Byzantine Empire between approximately 600 and 700 CE It covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire Whilst not neglecting the many differences between the Chinese and Byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare It shows that contrary to the conventional wisdom positing a straightforward Western way of war and an Oriental approach characterized by evasion and trickery the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China It argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the Eurasian steppes Overall this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society's way of war

Writing the Military History of Pre-Crusade Europe David S. Bachrach, Bernard S. Bachrach, 2020-12-29 Writing the Military History of Pre Crusade Europe brings together fourteen articles by eminent historians David S Bachrach and Bernard S Bachrach Crucial to the writing of medieval military history is a thorough understanding of the strengths and weaknesses of the available source materials Just as important is a broad conception of the range of sources which scholars can draw upon to ask and answer questions about the organization and conduct of war The studies collected in this volume provide insights regarding many of the most important narrative works from pre Crusade Europe with a particular emphasis on the ways in which they can be used to write military history as well as the pitfalls facing historians who read these texts transparently without regard for the authors various parti pris and limitations In addition to their treatment of narrative works several of the studies in this volume highlight the importance of treating historiographical texts within the broader range of source materials that illuminate the conduct and organization of war in pre crusade Europe particularly material sources developed through excavations as well as contemporary images most

prominently the Bayeux Tapestry The book will appeal to scholars and students of medieval history as well as those interested in military history CS1097 *The Oxford Encyclopedia of Medieval Warfare and Military Technology* Clifford J. Rogers,2010 From the Viking invasions to the Crusades to the Hundred Years War wars were crucial agents of change in medieval Europe They fostered many economic and political changes They also affected the science technology religion and culture of the parties involved Examines all aspects of warfare and military technology in medieval times and provides an exhaustive and accurate view of how and why wars were waged throughout Europe the Byzantine Empire and the Crusader States from circa 500 CE to circa 1500 **The Battle of Crécy** Michael Livingston,Kelly De Vries,2015-11-03 This casebook is the most extensive collection of documents ever assembled for the study of one of the famous battles in history the Battle of Cr cy 1346 *The Hammer of the Scots* David Santiuste,2015-04-30 Known to posterity as Scottorum Malleus the Hammer of the Scots Edward I was one of medieval England s most formidable rulers In this meticulously researched new history David Santiuste offers a fresh interpretation of Edward s military career with a particular focus on his Scottish wars This is in part a study of personality Edward was a remarkable man His struggles with tenacious opponents including Robert the Bruce and William Wallace have become the stuff of legend There is a clear and perceptive account of important military events notably the Battle of Falkirk but the narrative also encompasses the wider impact of Edward s campaigns He attempted to mobilize resources including men money and supplies on an unprecedented scale His wars affected people at all levels of society throughout the British Isles David Santiuste builds up a vivid and convincing description of Edward s campaigns in Scotland whilst also exploring the political background Edward emerges as a man of great conviction who sought to bend Scotland to his will yet also on occasion as a surprisingly beleaguered figure He is presented here as the central character in a turbulent world as commander and king **Administration and Organization of War in Thirteenth-Century England** David S. Bachrach,2020-03-11 The essays brought together in this volume examine the conduct of war by the Angevin kings of England during the long thirteenth century 1189 1307 Drawing upon a wide range of unpublished administrative records that have been largely ignored by previous scholarship David S Bachrach offers new insights into the military technology of the period including the types of artillery and missile weapons produced by the royal government The studies in this volume also highlight the administrative sophistication of the Angevin kings in military affairs showing how they produced and maintained huge arsenals mobilized vast quantities of supplies for their armies in the field and provided for the pastoral care of their men Bachrach also challenges the knight centric focus of much of the scholarship on this period demonstrating that the militarization of the English population penetrated to men in the lower social and economic strata who volunteered in large numbers for military service and even made careers as professional soldiers CS1088 *City Walls* James D. Tracy,2000-09-25 The essays presented in this volume first published in 2000 describe a phenomenon so widespread in human time and space that its importance is easily overlooked City walls shaped the history of

warfare the mobilisation of manpower and resources needed to build them favoured some kinds of polities over others and their massive strength appropriately ornamented created a visual language of authority Previous collective volumes on the subject have dealt mainly with Europe but the historians and art historians who collaborate here follow a comparative agenda The millennial practice of wall building that branched out from the ancient Near East into India Europe and North Africa shows continuities and points of contact of which the makers of urban fortifications were scarcely aware separate traditions in China sub Saharan Africa and North America illustrate universal themes of defensive strategy and the symbolism of power each time embedded in a distinctive local context Science and Technology in World History, Volume 2 David Deming, 2014-01-10 Science is a living organic activity the meaning and understanding of which have evolved incrementally over human history This book the second in a roughly chronological series explores the evolution of science from the advents of Christianity and Islam through the Middle Ages focusing especially on the historical relationship between science and religion Specific topics include technological innovations during the Middle Ages Islamic science the Crusades Gothic cathedrals and the founding of Western universities Close attention is given to such figures as Paul the Apostle Hippolytus Lactantius Cyril of Alexandria Hypatia Cosmas Indicopleustes and the Prophet Mohammed *Traditions and Transformations in Late Medieval England* Douglas Biggs, Sharon Michalove, Compton Reeves, 2021-10-25 This volume deals with political military social architectural and literary aspects of fifteenth century England The essays contained in the volume range across the century from some of the leading scholars currently working in the period Contributors Mark Addison Amos Douglas Biggs Kelly DeVries Matthew Boyd Goldie Virginia Henderson Gwyn Meirion Jones Michael Jones Helen Maurer Sharon D Michalove Michael D Myers Anthony J Pollard A Compton Reeves and Joel Rosenthal *Roman Military Equipment from the Punic Wars to the Fall of Rome, second edition* M. C. Bishop, John Coulston, 2006-04-22 Rome's rise to empire is often said to have owed much to the efficiency and military skill of her armies and their technological superiority over barbarian enemies But just how advanced was Roman military equipment What were its origins and how did it evolve The authors of this book have gathered a wealth of evidence from all over the Roman Empire excavated examples as well as pictorial and documentary sources to present a picture of what range of equipment would be available at any given time what it would look like and how it would function They examine how certain pieces were adopted from Rome's enemies and adapted to particular conditions of warfare prevailing in different parts of the Empire They also investigate in detail the technology of military equipment and the means by which it was produced and discuss wider questions such as the status of the soldier in Roman society Both the specially prepared illustrations and the text have been completely revised for the second edition of this detailed and authoritative handbook bringing it up to date with the very latest research It illustrates each element in the equipment of the Roman soldier from his helmet to his boots his insignia his tools and his weapons This book will appeal to archaeologists ancient and military historians as well as the generally informed and inquisitive reader

The Cambridge History of Science: Volume 3, Early Modern Science David C. Lindberg, Katharine Park, Ronald L.
