Medieval Science And Technology A Selected Annotated Bibliography:

Medieval Science and Technology Claudia Kren,1985 *Medieval Science and Technology* Elspeth Whitney,2004-10-30

Medieval science and technology was firmly rooted in Aristotelian explanations of the physical world This book begins by introducing the basic concepts of the classical tradition and explains how these ideas were promulgated by the ancient Greeks preserved and commented on by the great Muslim scholars of the early middle ages and finally transmitted to western Europe as that region began to grow and expand around 1100 C E Specific avenues of inquiry such as astronomy and astrology optics chemistry and alchemy zoology geography and medicine are described on their own terms Rounding out the work is a discussion of the many technological innovations of the medieval age such as mechanical clocks firearms and the blast furnace that profoundly altered the course of European and world history Biographical sketches provide insight into the lives and accomplishments of 20 men and women Christian Muslim and pagan whose works profoundly shaped the era s scientific spirit Eleven annotated key primary documents afford a fascinating glimpse into how the best minds of the time posed their questions and their answers An annotated timeline glossary of terms several illustrations and an annotated bibliography round out the work Medieval scientists or natural philosophers as they were then called were powerfully influenced by the authority of older traditions including Christianity and scientific ideas dating back to Plato Aristotle and Ptolemy Yet their respect for these traditions was balanced by an equal respect for reason and the spirit of inquiry Religious faith far from dampening scientific and technological innovation actually buttressed their efforts to understand the natural world as it was generally taken for granted that knowledge acquired through reason would harmonize with religious beliefs While medieval science and technology did not seek to overthrow the prevailing worldviews of the time their accomplishments did lay the groundwork for the scientific revolution and European global expansion of the early modern age

In Synchrony with the Heavens, Volume 1 Call of the Muezzin David King,2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices **Walford's Guide to Reference Material: Science and technology** Albert John Walford,1993 Cette bibliographie commentee touche tous les domaines du savoir humain soit de l Art a la Zoologie elle signale les ouvrages les plus importants soit des bibliographies des index des encyclopedies des dictionnaires des guides des revues etc dont le support ed information est soit du papier soit un cd rom soit une base de
