Television's Spatial Capital Myles McNutt,2021-12-30 This book launches a comprehensive detailing of the dramatic expansion of the geography of television production into new cities states provinces and countries and how those responsible for shaping the landscape of television have been forced to adapt taking established strategies for engaging with space and place through mediated representation and renegotiating them to account for the new map of television production Modeling media studies research that considers the intersection of production textuality distribution and reception Myles McNutt identifies how the expansion of where television is produced has intersected with the kinds of places represented on television and how shifts in the production distribution and consumption of television content have shifted the burden of representing cities and countries both locally and internationally Through a combination of industry interviews textual analysis and in depth consideration of industry and audience discourse the book argues that where television takes place matters more today than it ever has but that the current system of spatial capital remains constrained by traditional industry logics that limit the depth of engagement with place identity even as the expectation of authenticity grows significantly Representing a cross section of media industry studies television studies and cultural geography this book will appeal to scholars and students within multiple areas of media studies including production studies and audience studies in addition to television studies broadly

The Korean Wave in a Post-Pandemic World Geon-Cheol Shin,Mark D. Whitaker,2023-11-02 This book presents an analysis of how the economic Korean Miracle spread into the cultural Korean Wave Hallyu First only in Asian countries and then around the world the rising popularity of the Korean Wave continued within the pandemic despite or even because of policies of digital lockdowns Partially this has been by design as Korea for decades has had a very strong fast development drive in telecommunications and that aided the growth of its cultural wave Partially however this became exclusively by default how the Korean Wave had to spread increasingly in a digital manner after 2020 globally in response to many countries rules regarding the COVID 19 pandemic in their attempts to enforce a decline in face to face content consumption In retrospect this has meant only more digital growth and innovation for the Korean Wave in past years compared to other cultures entertainment complexes that suffered more Korea s earlier digital readiness combined with later lockdownconditions and pushed the Korean Wave further ahead Despite the ending of COVID

19 lockdowns in many countries a greater digital aftermath will continue in the cultural industry and in the economy in general This is due to changes created in cultural preferences in organizational investments and in communication technologies due to those lockdowns Thus the authors examine how the Korean Wave coped actively with a pronounced digital shift by default in all aspects of media including production distribution and consumption In turn they examine how the greater digital shift in the world s culture and economy influenced the Korean Wave s entertainment performances TV dramas and cosmetics among other areas The authors analyze general trends in the Korean Wave s economics culture and technology along with specific strong cases of the K pop boy group BTS the cosmetics manufacturer Cosmax and the television series Squid Game Since the Korean Wave continues to grow in popularity within a more exclusive digital socialization future implications of such a competitive digital world economy and multi polar digital world culture are discussed for all countries as well
