Taxation and the Cost of Capital in Hungary and Poland International Monetary Fund, 1990-12-01 This paper compares the effective rates of taxation

faced by a representative investor located in a major capital exporting country for investments in machinery and buildings in nine capital importing European countries Poland and Hungary are found to have relatively high effective tax rates on equity financed investment The analysis suggests that both countries would benefit from streamlining capital cost recovery allowances and possibly lowering statutory corporate tax rates as permitted by the revenue constraint rather than providing tax preferences for foreign investors **The Taxation of Financial Assets** Mr. John R.
