McChesney, 2013-03-05 Celebrants and skeptics alike have produced valuable analyses of the Internet s effect on us and our world oscillating between utopian bliss and dystopian hell But according to Robert W McChesney arguments on both sides fail to address the relationship between economic power and the digital world McChesney s award winning Rich Media Poor Democracy skewered the assumption that a society drenched in commercial information is a democratic one In Digital Disconnect McChesney returns to this provocative thesis in light of the advances of the digital age incorporating capitalism into the heart of his analysis He argues that the sharp decline in the enforcement of antitrust violations the increase in patents on digital technology and proprietary systems and other policies and massive indirect subsidies have made the Internet a place of numbing commercialism A small handful of monopolies now dominate the political economy from Google which garners an astonishing 97 percent share of the mobile search market to Microsoft whose operating system is used by over 90 percent of the world s computers This capitalistic colonization of the Internet has spurred the collapse of credible journalism and made the Internet an unparalleled apparatus for government and corporate surveillance and a disturbingly anti democratic force In Digital Disconnect Robert McChesney offers a groundbreaking

Jamie Susskind,2023-01-03 Wir haben die Kontrolle über die digitale Welt verloren Höchstes Zeit das zu ändern Es ist eine der wichtigsten Frage unserer Zeit Wie können wir im digitalen Zeitalter unsere Demokratie unsere Freiheit und unsere Rechte vor den Geschäftsinteressen der Tech Giganten schützen Jamie Susskind ist die junge kluge und berzeugende Stimme die die Antworten hat Noch vor kurzem galten Tech Unternehmen als Heilsbringer und Zukunftshoffnung ihre Webseiten und Apps als Mittel überall auf der Welt für mehr Demokratie zu sorgen Das ist vorbei Inzwischen fördern wir ihre Macht sie beeinflussen Wahlen verbreiten Fake News und zerstören das Leben von Menschen Der Staat findet keine Mittel gegen sie Wie kann es sein dass solche Firmen über dem Gesetz stehen Warum können wir ihnen nicht Einhalt gebieten Jamie Susskind zeigt welchen Einfluss AI Big Data und Social Media auf Politik und Gesellschaft haben Sein Buch ist ein fulminanter Aufruf und eine bahnbrechende Blaupause wie wir die Macht zurücklangen und die Tech Firmen unter demokratische Kontrolle bringen können The De Gruyter Handbook of Automated Futures Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23

How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is

underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation Black Ops Advertising Mara Einstein,2016-09-01 From Facebook to Talking Points Memo to the New York Times often what looks like fact based journalism is not It's advertising Not only are ads indistinguishable from reporting the Internet we rely on for news opinions and even impartial sales content is now the ultimate corporate tool Reader beware content without a corporate sponsor lurking behind it is rare indeed Black Ops Advertising dissects this rapid rise of sponsored content a strategy whereby advertisers have become publishers and

publishers create advertising all under the guise of unbiased information Covert selling mostly in the form of native advertising and content marketing has so blurred the lines between editorial content and marketing message that it is next to impossible to tell real news from paid endorsements In the 21st century instead of telling us to buy buy BUY marketers engage with us so that we share share SHARE the ultimate subtle sell Why should this concern us Because personal data personal relationships and our very identities are being repackaged in pursuit of corporate profits Because tracking and manipulation of data make likes and tweets and followers the currency of importance rather than scientific achievement or artistic talent or information the electorate needs to fully function in a democracy And because we are being manipulated to spend time with technology to interact with friends to always be on even when it is to our physical and mental detriment

Googling Security

Greg Conti, 2009 What Does Google Know about You And Who Are They Telling When you use Google's free services you pay big time with personal information about yourself

Google is making a fortune on what it knows about you and you may be shocked by just how much Google does know. Googling Security is the first book to reveal how Google's vast information stockpiles could be used against you or your business and what you can do to protect yourself. Unlike other books on Google hacking, this book covers information you disclose when using all of Google's top applications, not just what savvy users can retrieve via Google's search results. West Point computer science professor Greg Conti reveals the privacy implications of Gmail, Google Maps, Google Talk, Google Groups, Google Alerts, Google's new mobile applications, and more. Drawing on his own advanced security research, Conti shows how Google's databases can be used by others with bad intent, even if Google succeeds in its pledge of "don't be evil." Uncover the trail of informational bread crumbs you leave when you use Google search. How Gmail could be used to track your personal network of friends, family, and acquaintances. How Google's map and location tools could disclose the locations of your home, employer, family, and friends' travel plans and intentions. How the information stockpiles of Google and other online companies may be spilled, lost, taken, shared, or subpoenaed and later used for identity theft or even blackmail. How the Google AdSense and DoubleClick advertising services could track you around the Web. How to systematically reduce the personal information you expose or give away. This book is a wake-up call and a how-to self-defense manual, an indispensable resource for everyone from private citizens to security professionals who relies on Google. In an economy where markets are more unpredictable than ever, emotions can derail the efforts of even the most experienced investors and wreak havoc on portfolio returns. Applying powerful behavioral finance concepts, *Stop. Think. Invest.* provides a framework for identifying personal biases and avoiding mistakes that can cost big profits. Based on the author's extensive research and 100 key behavioral finance concepts, this guide provides a winning 12-step process you can use to successfully manage your trading and investing for long-term success, including: Begin the initial research into a new stock. Create an investment thesis: why are you buying the stock? Trade timing and size: when are you buying and how much? Make the initial purchase. Review the trade: round up or round down? Test your original investment thesis. *Stop. Think. Invest.* reveals critical information about behavioral finance flaws such as anchoring, confirmation bias, recency bias, and loss aversion. Unlike other behavioral investing guides, *Stop. Think. Invest.* offers a fully organized and practical approach to applying behavioral finance to everyday investing. **The Publishers Weekly**, 2008
