Given the inevitability of the widescreen market, acceptance of some form of high resolution widescreen video transmission, film and video production professionals will find the book's emphasis on the real life issues involved in using high definition in film style and live multi-camera productions invaluable. In *Preparing for a Widescreen World*, the book is organized into sections based on the major components of a production: Production, through Post Production, Engineering, Creative Considerations, and includes the experiences, insights, and anecdotes of some of the most experienced High Definition producers, directors, DPs, and engineers in the world. The Guide was written to appeal to people with various levels of technical knowledge. It includes an introductory section on video technology, anecdotal non-technical case studies, and the hard-core technical information that producers and engineers need to know to get their jobs done. REBO has led the way in field testing new equipment and ground-breaking applications for all aspects of high definition video technology since 1986. The company remains the only independent concern in the world involved in every aspect of high definition, from production, post-production, and programming, through education to research and applied technology development. Each year, REBO is recognized internationally by a diverse body of professionals for its achievements. Accolades include the Prix du Court Mètrage award for Best Fiction Short at the Cannes International Film Festival, special recognition from NASA for the first high definition videotaping of the shuttle launch, and for six straight years, the highest awards at the International Electronic Cinema Festival in Montreux and Tokyo.
