The ^APolitical Economy of Automotive Industrialization in East Asia Richard F. Doner,Gregory W. Noble,John Ravenhill,2021-04-21 Despite starting from equally low levels of performance and initially similar strategies the seven most prominent auto industries in East Asia outside Japan have ended up with strikingly different types and levels of development This book argues that factors such as market size and economic policies alone cannot explain this puzzle Instead the book highlights the significance of two sets of factors the very different institutional capabilities required to formulate and carry out policies and the political pressures that help to explain the emergence of these capabilities

Spatial Cultures Sam Griffiths,Alexander von Lünen,2016-06-10 What is the relationship between how cities work and what cities mean Spatial Cultures Towards a New Social Morphology of Cities Past and Present announces an innovative research agenda for urban studies in which themes and methods from urban history social theory and built environment research are brought into dialogue across disciplinary and chronological boundaries The collection confronts the recurrent epistemological impasse that arises between research focussing on the description of material built environments and that which is concerned primarily with the people who inhabit govern and write about cities past and present A reluctance to engage substantively with this issue has been detrimental to scholarly efforts to understand the urban built environment as a meaningful agent of human social experience Drawing on a wide range of historical and contemporary urban case studies as well as a selection of theoretical and methodological reflections the contributions to this volume seek to historically geographically and architecturally contextualize diverse spatial practices including movement encounter play procession and neighbourhood The aim is to challenge their tacit treatment as universal categories in much writing on cities and to propose alternative research possibilities with implications as much for urban design thinking as for history and the social sciences

Iran Auto Darius Mehri,2017-10-26 Since the revolution of 1979 scholars have portrayed the Islamic State s industrial development capacity in a negative light Global isolation incoherent economic planning and predatory Islamic institutions are often cited as the reasons for lackluster development In Iran Auto Building a Global Industry in an Islamic State Darius Mehri shows how this characterization is misguided Today Iran has one of the world s largest automobile industries with national technical capacity Previous studies ignore the consequences of three decades of Iran s capacity for successful industrialization and changes in global technology transfer that allow countries even ones isolated from formal global institutions to build an automobile industry Mehri shows how industrial nationalists in Iran constructed a network of politically effective relationships to open up space for successful local industrial development and then tapped into a set of important global linkages to create an industry with high local manufacturing content This book will open up a new line of inquiry into how countries in the global south can develop a successful national automobile industry without the need to conform to global economic institutions
