appropriate success of peace operations The patterns of conflict for the post cold war environment are changing and so are the approaches to military command and control Advances in information technology have enabled organizations and individuals to more effectively leverage the power of information yet for coalition operations where information sharing is essential to meet mission needs it continues to be problematic The issue is not technology but largely the will on the part of organizations and individuals to make it happen There is also a number of policy doctrine C4ISR systems cultural and environmental challenges that influence the ability to achieve more open sharing of information in coalition operations
