Copyright and Anonymity in the Creative User-Generated World

Rachel Maguire, 2025-05-01 This book explores the relationship between copyright law, online anonymity and creative user-generated content CUGC Presenting original empirical findings the book evaluates the co-existence of copyright law and normative systems regulating a CUGC landscape made up of artists, photographers and writers and makes novel recommendations for copyright reform It takes a multi-jurisdictional approach across Anglo-American and EU legal systems using the UK, USA and Germany as representative jurisdictions for legal analysis Qualitative findings are drawn from creators and communities on Reddit and 4chan Copyright subsists in much CUGC but pervasive anonymity makes it difficult for the law to regulate it effectively Simultaneously anonymity offers creative benefits in a way that highlights flaws in traditional justifications of copyright Comparisons between community norms and copyright law identify practical differences but also

fundamental compatibilities in terms of ownership expectations However the simultaneous existence of legal and normative enforcement mechanisms complicates matters for creators and potential users with negative implications for creativity and copyright law While existing reform efforts have made suggestions to create a UGC exception these overlook and undermine the role of CUGC creators as copyright holders This can be addressed through the consideration of a framework of supplementary CUGC guidelines when developing such reforms This valuable resource for researchers and students provides a distinct perspective in framing CUGC creators as copyright holders examining online anonymity as a pivotal factor influencing regulation
