in the Music Industry Peter Tschmuck,2012-03-07 Why did jazz become a dominant popular music genre in the 1920s and
 rock n roll in the 1950s Why did heavy metal punk rock and hiphop find their way from sub cultures to the established music
 industry What are the effects of new communication technologies and the Internet on the creation of music in the early 21st
 century These and other questions are answered by Peter Tschmuck through an integrated model of creativity and innovation
 that is based on an international history of music industry since Thomas A Edison invented the phonograph in 1877 Thus the
 history of the music industry is described in full detail By discussing the historic process of music production distribution and

reception the author highlights several revolutions in the music industry that were caused by the inference of aesthetic technological legal economic social and political processes of change On the basis of an integrated model of creativity and innovation an explanation is given on how the processes and structures of the present music industry will be altered by the ongoing digital revolution which totally changed the value added network of the production dissemination and use of music For the second edition the author has reworked chapter 9 in order to include all the developments which shaped the music industry in the first decade of the 21st century from Napster to cloud based music services and even beyond

YOU-TOPIA Erik Veldhoen,2013 You Topia You topia is about people and about organisations It s about the future of our society You topia is not a utopia but is based largely on experience and evidence You topia is also a work of philosophy based on logical reasoning that is grounded in experience and evidence You topia is a call to action How can we become our own leaders in this promising seductive world You topia is above all else about the journey that we must make to regain the balance between desire and discipline It is a world in which people and organisations perform better and are therefore happier and more successful Let the journey to You topia begin There s no excuse to put it off any longer It will be worth your while Welcome to the new world You topia Your ideal space Because it s all about the choices that you make The moments you choose to do everyday things The places you choose to do your work The people you choose to meet The relevant discipline you choose to exercise The relevant energy you choose to spend The inspiration that you seek to achieve a satisfactory balance in your life This ideal place isn t yours alone however We share the place in order to do our everyday things You can choose time and again but your choices must always fit smoothly into the larger organisation to which you belong and into the turbulent society around you Ultimately everyone has to see to their own needs Everyone has to develop the discipline required to meet the obligations that they take upon themselves the obligations they have towards themselves and towards their environment The choices we make in that respect will ultimately change the way we look at life And that might mean anything from orderly regularity to total chaos from an anarchical free state to a safe haven and from steady as a rock to Bacchanalian licentiousness We have to internalise the freedom we are given We have to combine the playing field and the rules of the game into a single formula and give them meaning If we do that respectfully and consciously then all will be well Ever since Frederick Taylor introduced his Principles of Scientific Management our work and our lives have been in the clutches of management You topia shows that severely curtailing our desire to manage everything will improve our lives Every individual can harness his or her own energy and master his or her productivity All organisations need do is facilitate this as best they can Not only is that possible but it is also going to happen because You topia is technology driven Without digitisation we would not have access to information any time anywhere

Without the virtual workspace we would not be able to work whenever and wherever it suits us Modern technology has weaned us off desks and offices and rigid timetables It has forced us to reconsider time and place And time and place must be given new meaning in a future that will be entirely different from our post industrial era You topia channels this innovation in a particular direction by looking holistically at our new physical virtual and mental reality In You topia less really is more The Musician's Business and Legal Guide Mark Halloran,2017-03-16 The Musician s Business and Legal Guide provides vital information to help demystify the music business and the complex body of law that shapes it This book answers such questions as how to protect name and copyright what is and is not legal about sampling what are the legal issues surrounding digital downloads and streaming what are the jobs of managers talent agents and publishers what are common contractual relationship between independent and major labels The new edition includes chapters not covered in depth by other books social media law TV talent shows YouTube and international copyright As in previous editions the book features clause by clause contract analyses for 360 record deals music publishing management and producer agreements
