Crossing the Stream, Leaving the Cave ,2024-04-05 Crossing the Stream Leaving the Cave brings philosophers from two of the world s great philosophical traditions Platonic and Indian Buddhist into joint inquiry on topics in metaphysics epistemology mind language and ethics An international team of scholars address selected questions of mutual concern to Buddhist and Platonist How can knowledge of reality transform us Will such transformation leave us speechless or disinterested in the world around us What is cause What is self knowledge And how can dreams shed light on waking cognition What do the paradoxes thrown up by abstract thought about

fundamental notions such as being and unity reveal Is it possible to attain unity in ourselves and should we even try Would doing so make us happy and is such happiness consistent with both contemplation of reality and action in the world With close readings of texts by Buddhaghosa Nagarjuna Vasubandhu Dignaga Bhaviveka Santideva by Plato Plotinus Porphyry Olympiodorus and Damascius among others these studies consider not just the different answers Buddhists and Platonists might give to these questions but also the criticisms they might bring to each other s positions the sort of arguments they use and the use they put these arguments to Bringing Platonic and the Buddhist perspectives jointly to bear creates a cosmopolitan philosophical exchange which yields greater conceptual clarity on the questions and the terms in which they are cast reveals unnoticed conceptual connections and opens up new possibilities for addressing central philosophical concerns

Learning to Understand Remote Sensing Images Qi Wang,2019-09-30 With the recent advances in remote sensing technologies for Earth observation many different remote sensors are collecting data with distinctive properties The obtained data are so large and complex that analyzing them manually becomes impractical or even impossible Therefore understanding remote sensing images effectively in connection with physics has been the primary concern of the remote sensing research community in recent years For this purpose machine learning is thought to be a promising technique because it can make the system learn to improve itself With this distinctive characteristic the algorithms will be more adaptive automatic and intelligent This book introduces some of the most challenging issues of machine learning in the field of remote sensing and the latest advanced technologies developed for different applications It integrates with multi source multi temporal multi scale data and mainly focuses on learning to understand remote sensing images Particularly it presents many more effective techniques based on the popular concepts of deep learning and big data to reach new heights of data understanding Through reporting recent advances in the machine learning approaches towards analyzing and understanding remote sensing images this book can help readers become more familiar with knowledge frontier and foster an increased interest in this field
