Classical and Modern Approaches in the Theory of Mechanisms Nicolae Pandrea, Dinu Popa, Nicolae-Doru Stanescu, 2017-02-14 Classical and Modern Approaches in the Theory of Mechanisms is a study of

mechanisms in the broadest sense covering the theoretical background of mechanisms their structures and components the planar and spatial analysis of mechanisms motion transmission and technical approaches to kinematics mechanical systems and machine dynamics In addition to classical approaches the book presents two new methods the analytic assisted method using Turbo Pascal calculation programs and the graphic assisted method outlining the steps required for the development of graphic constructions using AutoCAD the applications of these methods are illustrated with examples Aimed at students of mechanical engineering and engineers designing and developing mechanisms in their own fields this book provides a useful overview of classical theories and modern approaches to the practical and creative application of mechanisms in seeking solutions to increasingly complex problems Forms and Concepts for Lightweight Structures Koryo Miura,Sergio Pellegrino,2020-03-26

Covering a wide range of structural concepts and presenting both relevant theories and their applications to actual structures this book brings together for the first time lightweight structures concepts for many different applications and the relevant scientific literature thus providing unique insights into a fascinating field of human endeavour Evolved from a series of graduate courses taught by the authors at the University of Tokyo the Institute of Space and Astronautical Science the University of Cambridge and the California Institute of Technology this textbook provides both theoretical and practical insights and presents a range of examples which also provide a history of key lightweight structures since the Apollo age This essential guide will inspire the imagination of engineers and provide an analytical foundation for all readers Recent Advances in Machines, Mechanisms, Materials and Design Rajana Suresh Kumar,Shubhashis Sanyal,P.
