The Professionals of Scanner Radio

I'd love a Scanner But Please Help!

I would love to buy a scanner, but, quite simply I don't know where to start? I'm not even sure what I can listen to or what features I should look for! ... You're not alone!

Even some retailers are similarly in the dark - Don't be fooled by the pictures on the packaging or sucked in by comments that they can not receive signals inside the shop!

Check that your Scanner does cover the Frequencies you want to hear?

Please appreciate that this is only a small selection of the more "popular" services you can hear on a selection of vhf/uhf frequencies. To itemise all types of Commercial users would fill another book. Some sticky-breakers find identifying users, when searching the commercial bands, a challenge. eg local council, Government Departments, Couriers, Contractors, Taxis, Buses, Road Gangs, Airport Services etc etc, and have compiled extensive databases for their own interest.

Does your Scanner Allow you to:

1 Search specific bands (particularly those listed) to find active frequencies?

If yes, does it search in the **correct steps?** or at a step smaller than those listed that is a multiple of, eg You could search Police portables in 0.25KHz. It would take twice as long, but you wouldn't miss any usable Frequencies. Likewise with Cell Phones, 10 kHz steps will work, but 50% of search time will be wasted time.

2. Place the Frequencies you find into correctly designated Banks. eg Bank 1 - Marine, Bank 2 - Police, Bank 3 - Railways, Bank 4 - Couriers, Bank 4 - TV Audio, Bank 5 - Fire. Likewise, with Search Limits, Bank 1 - Marine, Bank 2 - Police VHF, Bank 3 - Police UHF, Bank 4 - Cell Phones etc.

You should always be able to find the range of all search bands so you are only looking at a few kHz with each sweep of the band. If your Scanner can be computer programmable, a good may have installed some search bands limits for you. A software programmable Scanner is an excellent option if you already own a computer.

Remember these Frequencies and Steps are always changing to suit latest technology etc. If you want to protect your purchase from the possibility of losing a service to a Frequency that is not available on your Scanner.... Buy one with **No Frequency Gaps, Selectable Steps, and Selectable Mode.** Remember there are still a number of AM Channels on 80 MHz and 150 MHz Bands. Make sure the dealer knows what you want to receive and that the dealer can confirm the scanner you have bought does tune the frequencies you require.

Remember - Ask your dealer to put a few memories or search bands in your new Scanner for you - if they are not familiar with the important features detailed above, then you are in the wrong place and should contact MRC or Com-Centre, where our Scanning Receivers are rarely turned off. We have the information at our finger-tips, can demonstrate the equipment and happily share our expertise with our customers.
