Handbook of Stress in the Occupations Janice Langan-Fox, Cary L. Cooper, 2011-01-01. The Handbook of Stress in the Occupations sets a new agenda for stress research and gives fresh impetus to scholars who wish to focus on issues and problems associated with specific jobs, some of which have received little attention in the past. Written by researchers who are true experts in the field of each occupation, this comprehensive Handbook reviews stress in a wide range of jobs including transport, education, farming, fishing, oil rig drilling, finance, law enforcement, fire fighting, entrepreneurship, music, social services, prisons, sport, and health, including surgery, internship, dentistry, nursing, paramedics, psychiatry, and social work. Several occupations such as oil rig drilling are reviewed; these jobs have always been stressful but have received little attention by researchers and only now receive more focus due to the Bay of Mexico accident. Other occupations demand more of our attention because there have been substantial technological changes in particular jobs such as in dentistry, nursing, and surgery. This lucid and insightful compendium will be a source of inspiration for those in the helping professions and all those individuals working in the industries described in the book. More specifically, the Handbook will strongly appeal to human resource specialists, psychologists, occupational health and safety professionals, managers, nurses, and therapists. Written in highly accessible language, it will also provide rich reading to lay audiences including job incumbents themselves as well as specialists in industry and academia. Academics and postgraduate students of business management and psychology will find plenty of detailed information regarding stress associated with occupations. Albert D. Kirwan Frank F. Sports-Related Concussions in Youth National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Sports-Related Concussions in Youth, 2014-02-04 In the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth Despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas Currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity Sports Related Concussions in Youth Improving the Science Changing the Culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents This report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence Sports Related Concussions in Youth finds that while some studies provide useful information much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion

symptoms The culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance Athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions Similarly military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded According to Sports Related Concussions in Youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer Improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes The findings and recommendations in this report set a direction for research to reach this goal
