

Photography Through the Years

1826 - The first portable camera (Daguerre) was used to create an image.

1839 - Camera Obscura is used to make an image on metal plates coated with chemicals. This was when the first permanent photograph was taken! It took 8 hours to take this photograph!

1839 - The first glass negative was used in Lippmann's process which needed exposure to make a negative and then processing to turn it into a positive to develop and fix the image. These plates were one of a kind and took only 15 minutes to take the photo.

1839 - The wet collodion process became the standard as the photographs made by this method are more detailed and sharper. Also the wet collodion process produces a negative that can be used to make duplicate photos.

1861 - First color photograph was made by taking multiple images through red, green, and blue filters. Then these images were combined to make a colored image.

1888 - Kodak made the first film camera, which had a 12-foot roll of film that held 100 photos. The made photography available to all! These photographs were 1.3 inches.

1888 - The first 1/2 image line reflect camera. Kodak. This camera used a single lens, a mirror, and a prism system which allowed the photographer to see exactly what would be seen by the camera.

1888 - First Kodak instant photo.

1975 - Eastman Kodak introduced the first digital camera that displayed photos on its screen. Digital cameras can store more photos than film.

1990 - Nikon offered the first 35mm digital single lens reflex camera, which combined a digital imaging sensor with the mechanisms and optics of a single lens reflex camera.

2000 - First camera phone is produced in Japan.
