Nice Positive Realism Maurizio Ferraris:

Positive Realism Maurizio Ferraris, 2015-12-11 Positive Realism could be seen as the sequel to Maurizio Ferraris Manifesto of New Realism and Introduction to New Realism The focus here is the other side of unamendability a notion described in his previous books according to which reality is unamendable it cannot be corrected at will This resistance of the real is what ultimately tells us that in opposition to the claims of post Kantian philosophy the world is not a result of our conceptual work if it were so our power over reality would be much greater Now the often disappointing limits that the real sets against our expectations are also a resource and this is the key point of the present book Things exist and therefore undoubtedly resist us but in doing so they offer affordances resources opportunities And that the greatest opportunity which underlies all the other ones is the fact that we share a world that is far from liquid on the contrary it provides the solid ground on which everything rests starting from our happiness or unhappiness *Introduction to New Realism* Maurizio Ferraris, 2014-12-18 Introduction to New Realism provides an overview of the movement of contemporary thought named New Realism by its creator and most celebrated practitioner Maurizio Ferraris Sharing significant concerns and features with Speculative Realism and Object Oriented Ontology New Realism can be said to be one of the most prescient philosophical positions today Its desire to overcome the postmodern antirealism of Kantian origin and to reassert the importance of truth and objectivity in the name of a new Enlightenment has had an enormous resonance both in Europe and in the US Introduction to New Realism is the first volume dedicated to exposing this continental movement to an anglophone audience Featuring a foreword by the eminent contemporary philosopher and leading exponent of Speculative Realism Iain Hamilton Grant the book begins by tracing the genesis of New Realism and outlining its central theoretical tenets before opening onto three distinct sections The first Negativity is a critique of the postmodern idea that the world is constructed by our conceptual schemas all the more so as we have entered the age of digitality and virtuality The second thesis positivity proposes the fundamental ontological assertion of New Realism namely that not only are there parts of reality that are independent of thought but these parts are also able to act causally over thought and the human world The third thesis normativity applies New Realism to the sphere of the social world Finally an afterword written by two young scholars explains in more detail the relationship between New Realism and other forms of contemporary realism *Encounters with the Real in Contemporary Italian Literature and Cinema* Loredana Di Martino, Pasquale Verdicchio, 2017-01-06 This volume explores the Italian contribution to the current global phenomenon of a return to reality by examining the country's rich cultural production in literature and cinema The focus is particularly on works from the period spanning the Nineties to the present day which offer alternatives to notions of reality as manufactured by the collusion between the neo liberal state and the media The book also discusses Italy's relationship with its own cultural past by investigating how Italian authors deal with the return of the specter of Neorealism as it haunts the modern artistic imagination in this new epoch of crisis

Furthermore the volume engages in dialogue with previous works of criticism on contemporary Italian realism while going beyond them in devoting equal attention to cinema and literature The resulting interactions will aid the reader in understanding how the critical arts respond to the triumph of hyperrealism in the current era of the virtual spectacle as they seek new ways to promote cognitive transformations and foster ethical interventions [A World Not Made for Us](#) Keith R. Peterson,2020-09-01 In *A World Not Made for Us* Keith R Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorial ontology that affirms the basic principle of human asymmetrical dependence on more than human nature Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this fact is a condition for survival in future human and more than human communities of liberation and solidarity

Nature and Realism in Schelling's Philosophy AA.VV.,2017-05-10 In recent years the international philosophical debate around the so called new realism has undoubtedly aroused renewed interest in the philosophical positions of Schelling an author who right in the midst of the philosophical project of German Idealism forcefully insinuated the natural realistic objection leading to a breakaway towards contemporary thinking In this book Iain Hamilton Grant Alistair Welchman Emilio Carlo Corriero Manfred Frank Andrea Dezi Olaf M ller Maurizio Ferraris display their perspectives on the topic
